- Sole proprietorships and partnerships outnumber corporations but corporations are the dominant form of business organization
- **Corporation:** acquire capital from investors in exchange for ownership interest and from creditors form borrowing
- **Initial Market Transactions:** issuance of stocks and bonds between individuals and institutions
- **Secondary Market Transactions:** transfer of stocks and bonds between individuals and organizations
- Corporations should provide information to investors/creditors that evaluates the amounts, timing, and uncertainty of future cash receipts and disbursements
 - **Rate of Return:** (dividends + share price appreciation)/initial investment
- **Cash Accounting:** revenue is recognized when its received and expenses are recognized when cash is paid
 - **Net Operating Cash Flow**
 - Short-run operating cash flows might not be indicative of long-run cash-generating ability
- **Accrual Accounting:** revenue is recognized when earned and expenses are recognized when incurred
 - **Net Income/Loss**
 - Used by most profit-oriented companies & many nonprofits

The Development of Financial Accounting & Reporting Standards

- **Generally Accepted Accounting Principles (GAAP):** set of guidelines companies follow when measuring and reporting the information in financial statements and related notes
- The **Securities & Exchange Commission (SEC)** was created by congress to set accounting and reporting standards for publicly traded companies...they gave it off to the private sector
- The first body to assume the task was the committee on accounting procedure (CAP)
