G,2018-08-25 Since the CPC exam covers so many topics it s easy to get overwhelmed in the preparation stages Here are a couple ways of to cope with this large intimidating exam During the exam you ll spend the most time with the CPT manual While there are some questions on ICD 10 CM codes and HCPCS there are far more questions that relate to the CPT code set so it s good to focus your study efforts there Know the manual back to front and be comfortable navigating it and using its numerous appendices Most people take the exam only after they ve been working in coding for a little while to be certified the CPC requires a passing score and two years of professional experience or the educational equivalent If you ve amassed that experience you should be relatively familiar with medical terminology and anatomy and physiology Still it s a very good idea to brush up with this through flash cards or review courses There will be questions on the exam that explicitly reference medical or anatomical terminology questions like What kind of joint is this but having a strong medical vocabulary will help you in deciphering other questions as well Once you ve studied up be sure to take advantage of as many practice exams as you can Treat these exams like real tests study extensively for them time yourself as you take them and then note which questions and more importantly what type of questions you regularly get wrong On your first test did you struggle with the Anesthesia codes Go back over that section Were you sloppy with your ICD 10 CM codes Review the ICD 10 CM manual A number of private companies have practice

CPC exams but the AAPC's practice exams are probably your best bet. Don't treat practice exams as formalities or wastes of time. Many practice exams can be easier than the actual exam but you should still take them seriously. You should try and score at least an 80% on a practice exam before you take the real CPC exam.

TAKING THE TEST When you take the CPC exam you're allowed to bring in each of the code manuals: the ICD, CPT, and HCPCS manuals. You're allowed to have notes in the margins of these manuals but these notes can't contain any test-specific information. You are also not allowed to tape anything into these manuals. It's a good idea to mark the important or frequently used sections of your code manuals. The CPT manual for instance comes with a number of tabs you can place in the book to mark certain important places. Use these to mark off where code sections begin like the Surgery or Medicine sections in the CPT manual and where to find certain appendices. When you're taking the CPC exam you'll be asked to perform though you were coding at your regular coding job so set up your manual in the way that makes the most sense for you. Also be aware that each manual has loads of helpful information beyond the codes. The CPT manual has a number of diagrams of the human body including illustrations of the ocular system and adnexa, the musculoskeletal system, the nervous system, and much more. Mark these pages and refer to them during the test if you're stumped on a question pertaining to anatomical terminology.
