## Analyzing an NYSE Euronext Listing

Investors follow changes for various stocks to determine which ones to invest in. Each day, information about each company's stock is released by the stock exchanges. Often, this information is organized in a table. It is important for investors to be able to analyze the table in order to make wise investment decisions.

**Directions:** Examine the chart below and then answer the following questions. If you need help with the terms, reread the section on stocks in Lesson 3.

12-MONTH HI	12-MONTH LO	STOCK (SYM)	PER	YIELD	P/E	EPS	LAST	NET CHG
82.04	29.98	Academy (A)	0.48	1.28	34.82	671	81.56	0.25
65.96	42.60	ExxonMobil(XOM)	1.28	2.73	18.25	25,996	64.88	-1.78
128.04	86.81	Radio Corp (RDO)	0.11	0.38	25.01	1,078	108.92	-5.51
78.48	4.75	Amgen (AMGN)	0.88	3.78	48.8	78,488	4.99	-0.21

1. Examine column PER. The 34.82 for ExxonMobil tells us that an investor would have to buy \$34.82 of stock to get \$1 of current earnings. Would it be a better deal or a worse deal to buy shares of Radio Corp? Why?

---

---

---

2. Examine the column labeled "HDDs." This column tells how many hundreds of stocks were traded that day. Which stock was the most traded? Which stock was the second most traded?

*Encyclopedia of Optimization* Christodoulos A. Floudas, Panos M. Pardalos, 2008-09-04 The goal of the Encyclopedia of Optimization is to introduce the reader to a complete set of topics that show the spectrum of research the richness of ideas and the breadth of applications that has come from this field The second edition builds on the success of the former edition with more than 150 completely new entries designed to ensure that the reference addresses recent areas where optimization theories and techniques have advanced Particularly heavy attention resulted in health science and transportation with entries such as Algorithms for Genomics Optimization and Radiotherapy Treatment Design and Crew Scheduling

**Bulletin** ,1958      **Mathematical Reviews** ,1987      System-Theoretic Methods in Economic Modelling I S. Mittnik, 2014-06-28 The value of applying system theoretic concepts to economic modelling problems arises from the fact that it offers a unifying framework for modelling dynamic systems In addition to offering this powerful conceptual framework it provides a wide range of tools useful in applied work System theoretic techniques enter predominantly two stages of economic modelling efforts the stage of model construction and the stage of model application in accordance with the modelling The objective of this and subsequent volumes on System Theoretic Methods in Economic Modelling I is to initiate and or intensify dialogues between researchers and practitioners within and across the disciplines involved This first volume brings together papers exhibiting a wide range of system theoretic techniques and applications to economic problems The papers have been divided into two groups following roughly but not necessarily the above classification into the construction and application stages of economic modelling The papers in the first group focus on the identification of dynamic and static systems while the papers in the second group address dynamic optimization problems      **Modeling and Control of Economic Systems 2001** R. Neck, 2003-05-21 This volume contains papers presented at the IFAC symposium on Modeling and control of Economic Systems SME 2001 which was held at the university of Klagenfurt Austria The symposium brought together scientists and users to explore current theoretical developments of modeling techniques for economic systems It contains a section of plenary invited and contributed papers presented at the SME 2001 symposium The papers presented in this volume reflect advances both in methodology and in applications in the area of modeling and control of economic systems      *Economics* Gary E. particular there is a lack of studies investigating the interplay i.e. moderation and mediation between cognitive and affective factors on learning. The goal of this Research Topic is to deepen our knowledge on the relations between learning and both cognitive and affective factors in different age groups. We aim to provide a broad scope of emerging areas in research on cognitive and affective factors especially related to academic learning e.g. mathematics, reading and other school subjects. Studies focusing simultaneously looking at the interplay of these constructs as well as longitudinally are of great interest. Further we are interested in innovative study designs and recent advances in methodology in this field. To promote quality education for all and equity in education cognitive and affective factors related to aspects of learning ranging from pre school to tertiary provision and inclusion of individuals with special educational needs are of interest.
