Swordfish Richard Ellis, 2013-04-15 A perfect fish in the evolutionary sense the broadbill swordfish derives its name from its distinctive bill much longer and wider than the bill of any other billfish which is flattened into the sword we all recognize And though the majesty and allure of this warrior fish has commanded much attention from adventurous sportfishers eager to land one to ravenous diners eager to taste one no one has yet been bold enough to truly take on the swordfish as a biographer Who better to do so than Richard Ellis a master of marine natural history *Swordfish A Biography of the Ocean Gladiator* is his masterly ode to this mighty fighter The swordfish whose scientific name means gladiator can take on anyone and anything including ships boats sharks submarines divers and whales and in this book Ellis regales us with tales of its vitality and strength Ellis makes it easy to understand why it has inspired so many to take up the challenge of epic sportfishing battles as well as the longline fishing expeditions recounted by writers such as Linda Greenlaw and Sebastian Junger Ellis shows us how the bill is used for defense contrary to popular opinion it is not used to spear prey but to slash and debilitate like a skillful saber fencer Swordfish he explains hunt at the surface as well as thousands of feet down in the depths and like tuna and some sharks have an unusual circulatory system that gives them a significant advantage over their prey no matter the depth in which they hunt Their adaptability enables them to swim in waters the world over tropical temperate and sometimes cold and the largest ever caught on rod and reel was landed in Chile in 1953 weighing in at 1 182 pounds and this heavyweight fighter like all the largest swordfish was a female Ellis s detailed and fascinating fact filled biography takes us behind the swordfish s huge cornflower blue eyes and provides a complete history of the fish from prehistoric fossils to its present day endangerment as our taste for swordfish has had a drastic effect on their population the world over Throughout the book is graced with many of Ellis s own drawings and paintings which capture the allure of the fish and bring its splendor and power to life for armchair fishermen and landlocked readers alike

Incarcerating the Crisis Jordan T. Camp, 2016-04-18 The United States currently has the largest prison population on the planet Over the last four decades structural unemployment concentrated urban poverty and mass homelessness have also become permanent features of the political economy These developments are without historical precedent but not without historical explanation In this searing critique Jordan T Camp traces the rise of the neoliberal carceral state through a series of turning points in U S history including the Watts insurrection in 1965 the Detroit rebellion in 1967 the Attica uprising in 1971 the Los Angeles revolt in 1992 and events in post Katrina New Orleans in 2005 *Incarcerating the Crisis* argues that

these dramatic events coincided with the emergence of neoliberal capitalism and the state's attempts to crush radical social movements. Through an examination of the poetic visions of social movements including those by James Baldwin, Marvin Gaye, June Jordan, José Martí, and Suni Patterson, it also suggests that alternative outcomes have been and continue to be possible.

State of Disaster Maria Cristina Garcia, 2022-08-10. Natural disasters and the dire effects of climate change cause massive population displacements and lead to some of the most intractable political and humanitarian challenges seen today. Yet as Maria Cristina Garcia observes in this critical history of U.S. policy on migration in the Global South, there is actually no such thing as a climate refugee under current U.S. law. Most initiatives intended to assist those who must migrate are flawed and ineffective from inception because they are derived from outmoded policies. In a world of climate change, U.S. refugee policy simply does not work. Garcia focuses on Central America and the Caribbean where natural disasters have repeatedly worsened poverty, inequality, and domestic and international political tensions. She explains that the creation of better U.S. policy for those escaping disasters is severely limited by the 1980 Refugee Act, which continues to be applied almost exclusively for reasons of persecution directly related to politics, race, religion, and identity. Garcia contends that the United States must transform its outdated migration policies to address today's realities. Climate change and natural disasters are here to stay, and much of the human devastation left in their wake is essentially a policy choice.

Necrogeopolitics Caroline Alphin, François Debrix, 2019-10-08. *Necrogeopolitics: On Death and Death Making in International Relations* brings together a diverse array of critical IR scholars, political theorists, critical security studies researchers, and critical geographers to provide a series of interventions on the topic of death and death making in global politics. Contrary to most existing scholarship, this volume does not place the emphasis on traditional sources or large-scale configurations of power force leading to death in IR. Instead, it details, theorizes, and challenges more mundane, perhaps banal, and often ordinary modalities of violence perpetrated against human lives and bodies, and often contributing to horrific instances of death and destruction. Concepts such as slow death, soft killing, superfluous bodies, or extra-ordinary destruction, disappearance, are brought to the fore by prominent voices in these fields, alongside more junior creative thinkers, to rethink the politics of life and death in the global polity away from dominant IR or political theory paradigms about power force and violence. The volume features chapters that offer thought-provoking reconsiderations of key concepts, theories, and practices about death and death making, along with other chapters that seek to challenge some of these concepts, theories, or practices in settings that include the Palestinian territories, Brazilian cities, displaced population flows from the Middle East, sites of immigration, policing in North America, and spaces of welfare politics in Scandinavian states.
