Indoor Unit Mounting

Mounting the Installation Plate to the Wall

Follow the procedure below and general best practices when mounting the indoor unit's installation plate to a wall.

⚠ WARNING

When choosing a location for the wall mount plate, be sure to take into consideration routing of wiring for power outlets within the wall. Contacting wiring can cause serious bodily injury or death.

Use caution when drilling holes through the walls for the purposes of piping connections. Power wiring can cause serious bodily injury or death.

Note:

Select location carefully. Unit must be anchored to a strong wall to prevent unnecessary vibration.

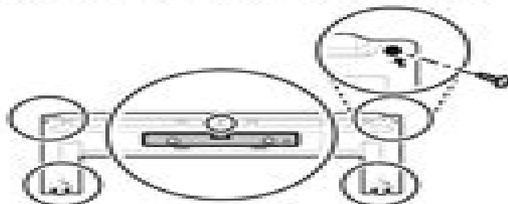

1. The wall mounted indoor unit is shipped with the installation plate attached to its back. To remove, Unscrew all screw / screws that hold the installation plate to the back of the indoor unit. Number of screws depends on the indoor unit model.
2. Confirm the location where the installation plate will be placed. (Install the indoor unit on a strong, hard wall that can withstand its weight.)
3. Align the centerline using a leveling tool. Measure the wall and mark the centerline.
4. Attach the installation plate to the wall following the measurements and marks. Use the type "A" screws that are factory-supplied with the plate.
 - Insert a screw into the center hole of the installation plate, and tighten.
 - Verify the installation plate is horizontal using a leveling tool.
 - Tighten the remaining screws into the holes indicated on the installation plate.

Note:

If the installation plate is not level, any condensate will not drain away smoothly, will leak into the room, and will damage walls and floors.

5. Observe all rear piping clearances when drilling into the wall.
