education community Policy-Making in the GCC Neil Quilliam, Mark C. Thompson, 2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East Despite the rise in prominence of individual Gulf states especially Kuwait Qatar Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike *Family Life, Family Law, and Family Justice* Marsha

Garrison, 2022-10-28 *Family Life, Family Law, and Family Justice* Tying the Knot combines history social science and legal analysis to chart the evolution and interdependence of family life and family law portray current trends in family life explain the pressing policy challenges these trends have produced and analyze the changes in family law that are essential to meeting these challenges The challenges are large and pressing Across the industrialized West nonmarital birth relational stress multi partner fertility and relationship dissolution have increased producing a dramatic rise in single parenthood poverty and childhood risk This concentration of familial and economic risk accelerates socioeconomic inequality and retards intergenerational mobility Although the divide is most pronounced in the United States the same patterns now affect families throughout the Western world Across the European Union there are 9.2 million lone parents and just under half of their families live in poverty Tying the Knot demonstrates how today's family patterns are deeply rooted in long standing class based differences in family life and explains why these class based differences have accelerated It explains how the values that guide family law development inevitably reflect the world in which families live and develops a new family law capable of meeting the needs of twenty first century families The book will be of considerable interest to family specialists from a number of fields including law demography economics history political science public health social policy and sociology
