POPcorn facts - Explain to students that they will be counting multiples of 2 about while "blasting and holding their breath" like a corn kernel. When a multiple of 2 is said, students will POP up as they say the multiple of 2, and then return to a small kernel. (Example: 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, etc.)

- Students count multiples of 2 - POP with multiples of 100
- Students count multiples of 5 - POP with multiples of 50

Sticks, Sticks, the multiplication context! and ask students what can be said instead of "sticks". Record items of the "groups of" they learned in the last lesson. Draw a model of 3 rows of 5 and ask them what they notice. Explain that the multiplication context can also mean "rows of" when determining dimensions of rows and columns.

Give each student a piece of the multiplication array graphing paper and make instructions. Have students build the array for each multiplication fact after saying "rows of" instead of "sticks" (3 x 6, "rows of 6").

After building the array with counters, have students color the grid to show the same model and write the product. Then, students can turn the paper sideways to see the related fact, using the "rows" they see and counting the "sticks" in each row. A hand copy is included for teachers to abbreviate lessons.

Give each student a copy of the "Sticks or Sides" worksheet. Students will cut and glue to match the multiplication fact to the correct array. Then, students will find the product and fill in the blank.
