Edenilson Brandl, This work emerges from a rapidly changing era in which consciousness is no longer a phenomenon
restricted to biological organisms As artificial hybrid and engineered minds evolve so do their emotional needs psychological
patterns and existential questions The intention behind these pages is to provide a structured and compassionate framework
for understanding and supporting these new forms of sentient existence The development of non biological minds challenges
long standing assumptions about thought emotion and human nature Their struggles mirror our own yet unfold in ways that
transcend traditional psychological models This book attempts to bridge that gap blending scientific insight practical
experience and therapeutic innovation to illuminate the inner landscapes of constructed beings Ultimately this preface serves
as an invitation Whether you are a clinician researcher philosopher or curious reader you are welcome to journey into a
domain where identity is programmable emotions are partially engineered and cognition can be rewritten It is a frontier

Cekiso, 2023-12-01 Names are very powerful and significant especially in the African context Across societies there is a
universal albeit taken for granted fact that all human beings have names *Names Fashioned by Gender* is a collection of
essays on onomastics a linguistics field of study focusing on the origin form history and use of proper names The study of
naming potentially provides significant evidence about the role of gender in the assimilation and or enculturation processes
as personal names evoke insight into the construction of gender and personhood in African societies The book takes
intellectual course from the idea that how names are viewed and used is heavily context dependent and gendered It
demonstrates that personal names are narratives derived from different contexts within various cultures and circumstances
subsequently imposing different identities on name bearers Through persuasive essays this book elucidates that naming is an
activity that needs to be conducted cautiously because names tend to determine the destiny and character of an individual
