Mastering Self-Confidence Ronald Alexis Valentino,2015-11-20 I used to believe that total self confidence is something that one acquires in the womb that the characteristics of a very confident person are either part of a very special gene or simply luck to have been born with that personality In fact I kept that way of thinking until my late teen years It wasn't until one day that I woke up and finally realized that there should be more to life than being unconfident and travel through life unnoticed that was also the day that I decided to take action and create a well detailed plan to transform my life In this book I have summarized the most effective ways and techniques that have allowed me to become the confident person that I now am I have included the essential steps that if followed as instructed will take your confidence level through the roof And the best thing is that you should be able to accomplish these results in a fraction of the time that it has taken me In this book you should expect to discuss and learn about the following how to manage self doubt how to always feel good without need of anyone else's approval or opinions Preparation of the mind body and soul to achieve total self confidence How to take charge of social interactions Becoming more confident at work The role that body language plays in confidence Overcoming the fear of public speaking You will learn about each one of these topics and I will show you techniques and mental tricks that you can use to get yourself in an unstoppable state Click the Buy this book now button to begin transforming your life and leave the old introvert you in the past

Confidence Culture Shani Orgad,Rosalind Gill,2021-12-06 In Confidence Culture Shani Orgad and Rosalind Gill argue that imperatives directed at women to love your body and believe in yourself imply that psychological blocks rather than entrenched social injustices hold women back Interrogating the prominence of confidence in contemporary discourse about body image workplace relationships motherhood and international development Orgad and Gill draw on Foucault's notion of technologies of self to demonstrate how confidence culture demands of women near constant introspection and vigilance in the service of self improvement They argue that while confidence messaging may feel good it does not address structural and systemic oppression Rather confidence culture suggests that women along with people of color the disabled and other marginalized groups are responsible for their own conditions Rejecting confidence culture's remaking of feminism along individualistic and neoliberal lines Orgad and Gill explore alternative articulations of
