

**NEVER** put hands, arms, head, or legs through the mast or near the carriage or lift chains. This warning applies not only to the operator but also a forklift. A forklift mast not be near the feet of lift mechanism while the operator is attempting to handle a load. The lift mechanism has moving parts with close clearances that can cause serious injury.

Lift and lower with the mast vertical or that slightly back-ward from vertical. Lift elevated loads forward only when directly over the intended place. Never operate mast fully and then forward lift.

### **⚠ WARNING**

The lift truck can tip over forward when the load is raised. Forward tipping is even more likely when lifting forward, braking when steering forward or accelerating in REVERSE.

**IF THE LIFT TRUCK TIPS OVER, DO NOT JUMP OFF. HOLD FIRMLY TO STEERING WHEEL, BRACE YOUR FEET, AND LEAN AWAY FROM POINT OF IMPACT.**

If the lift mechanism is raised to pick up or deposit a load, keep the lift angle in either direction to a minimum. Back-ward and forward lift are taught, but they affect side and forward stability. Do not lift in either direction any more than necessary when handling elevated loads. Never operate mast fully and then forward lift. The lift truck can tip forward if the mast is tilted forward with the mast in the raised position.

### Traveling With a Load

1. When traveling with the load lowered, keep the load spaced the carriage and the mast that fully backward. This action will help keep the load on the forks and give good forward and side stability.

2. Travel with the lift mechanism raised only enough to clear the ground or obstacles.

When the mast, carriage, or load is in a raised position, the stability of the lift truck is reduced. This is also critical when the lift truck is not carrying a load. The ability of the lift truck to resist side tipping can be less on a lift truck without a load than it is on a lift truck with a load in the lowered travel position. Therefore, a lift truck without a load is more likely to tip sideways, especially in a turn, than a lift truck with a load carried in the lowered position.

### **⚠ WARNING**

The lift trucks have mirrors for viewing along the side to observe the safe swing area. These mirrors are an aid to the driver, but are NOT driving mirrors and must NOT be used as such when operating in reverse. Always look in the direction of travel to avoid damage to something or injury to someone.
