

IPI Storage Guide for Acetate Film

James M. Reilly • Director, Image Permanence Institute

Instructions for Using the Wheel, Graphs, and Table

Basic Strategy for Film Preservation

• The *IPI Storage Guide for Acetate Film* provides an overview of environmental specifications for film storage. It explains the relationship between temperature, relative humidity (RH), and "vinegar syndrome," the slow chemical decomposition of acetate plastics leading to loss of their value in a film collection.

• The main purpose of the Guide is to help collection managers evaluate the quality of the storage environment they provide for their film. The Guide is not meant to predict the life of any individual film; it merely uses predicted life span as a yardstick to measure the quality of the storage environment.
