Report for Teachers,2005-01-23 How do you get a fourth grader excited about history How do you even begin to persuade  
high school students that mathematical functions are relevant to their everyday lives In this volume practical questions that  
confront every classroom teacher are addressed using the latest exciting research on cognition teaching and learning How  
Students Learn History Mathematics and Science in the Classroom builds on the discoveries detailed in the bestselling How  
People Learn Now these findings are presented in a way that teachers can use immediately to revitalize their work in the  
classroom for even greater effectiveness Organized for utility the book explores how the principles of learning can be applied  
in teaching history science and math topics at three levels elementary middle and high school Leading educators explain in  
detail how they developed successful curricula and teaching approaches presenting strategies that serve as models for  
curriculum development and classroom instruction Their recounting of personal teaching experiences lends strength and  
warmth to this volume The book explores the importance of balancing students knowledge of historical fact against their  
understanding of concepts such as change and cause and their skills in assessing historical accounts It discusses how to build  
straightforward science experiments into true understanding of scientific principles And it shows how to overcome the  
difficulties in teaching math to generate real insight and reasoning in math students It also features illustrated suggestions  
for classroom activities How Students Learn offers a highly useful blend of principle and practice It will be important not only
