MARK SCHEME

Maximum Mark: 50

1111/02

October 2021

IMPORTANT NOTICE

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Markers were instructed to award marks. It does not indicate the details of the discussions that took place at a Markers' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the End of Series Report. Cambridge will not enter into discussions about these mark schemes.

English Cambridge Ms Paper 2 June 2013:

Cross-linguistic Investigations of Nominalization Patterns Ileana Paul, 2014-02-15 The chapters in this volume address current topics in the morphology syntax and semantics of nominalizations drawing on a range of typologically and geographically diverse languages Nominalizations represent a long standing puzzle to linguists How is a noun such as destruction related to the verb destroy The semantic parallel between the deverbal nominalization and its related verb suggests that there is a close connection between the two This volume contributes to the ongoing debates on how to capture this connection and how to account for the apparent mixed categorical status of nominalizations This volume is essential for students and researchers interested in the morphology syntax and syntax semantics interfaces *Routledge Handbook of Politics and Technology* Ulrich Hilpert, 2015-10-05 This handbook provides a comprehensive global survey of the politics of technology Written by an outstanding line up of distinguished scholars in the field the handbook covers all aspects of the relationship between politics and technology including Demand and support for new technologies and innovation by the state The effects of technology policies Technology development and innovation difference between various countries and regions Policy instruments and techno industrial innovation Dynamism and change as outcomes of government policies Driving forces for science and innovative development Forming the basis of this handbook are examples of regional development country studies and a rich variety of technologies as well as topical issues such as divergent political interests in relation to technology and the economic exploitation of technologies Employing a comparative and interdisciplinary approach in order to analyse the interplay between government activities and the development of new technologies this handbook will be an invaluable resource for all students scholars and practitioners working in the politics of technology public policy and policy analysis **The Routledge Handbook of African Linguistics** Augustine Agwuele, Adams Bodomo, 2018-03-09 The Handbook of African Linguistics provides a holistic coverage of the key themes subfields approaches and practical application to the vast areas subsumable under African linguistics that will serve researchers working across the wide continuum in the field Established and emerging scholars of African languages who are active and current in their fields are brought together each making use of data from a linguistic group in Africa to explicate a chosen theme within their area of expertise and illustrate the practice of the discipline in the continent **Smart Cities** Antoine Picon, 2015-11-16 As cities compete globally the Smart City has been touted as the important new strategic driver for regeneration and growth Smart Cities are employing information and communication technologies in the quest for sustainable economic development and the fostering of new forms of collective life This has made the Smart City an essential focus for engineers architects urban designers urban planners and politicians as well as businesses such as CISCO IBM and Siemens Despite its broad appeal few comprehensive books have been devoted to the subject so far and even fewer have tried to relate it to cultural issues and to assume a truly critical stance by trying to decipher its consequences on urban space and experience This cultural and critical

lens is all the more important as the Smart City is as much an ideal permeated by Utopian beliefs as a concrete process of urban transformation This ideal possesses a strong self fulfilling character our cities will become Smart because we want them to This book opens with an examination of the technological reality on which Smart Cities are built from the chips and sensors that enable us to monitor what happens within the infrastructure to the smartphones that connect individuals Through these technologies the urban space appears as activated almost sentient This activation generates two contrasting visions on the one hand a neo cybernetic ambition to steer the city in the most efficient way and on the other a more bottom up participative approach in which empowered individuals invent new modes of cooperation A thorough analysis of these two trends reveals them to be complementary The Smart City of the near future will result from their mutual adjustment In this process urban space plays a decisive role Smart Cities are contemporary with a spatial turn of the digital Based on key technological developments like geo localisation and augmented reality the rising importance of space explains the strategic role of mapping in the evolution of the urban experience Throughout this exploration of some of the key dimensions of the Smart City this book constantly moves from the technological to the spatial as well as from a critical assessment of existing experiments to speculations on the rise of a new form of collective intelligence In the future cities will become smarter in a much more literal way than what is often currently assumed

Daily Graphic Ransford Tetteh,2014-04-28 **Industrial Development Report 2013** United Nations,2014-03-15 This Report demonstrates that a more sustainable energy future is within our reach and that industrial energy efficiency is key It shows how industrial energy efficiency can make a difference by providing a detailed comprehensive global assessment of potentials technologies economic benefits as well as cost and barriers to be removed It provides an overview of the policy instruments most useful for developing economies This innovative work also reminds us that we must act now if we are to unlock the potential of current and emerging energy efficiency technologies The opportunities are significant by reducing energy inputs per unit of output we will benefit from improvements in standards of living while protecting the environment

Islam, Modernity and a New Millennium Ali Paya,2018-02-02 As the world becomes increasingly globalised Islam faces some important choices Does it seek to modernise in line with the cultures in which it is practised or does it retain its traditions even if they are at odds with the surrounding society This book utilizes a critical rationalist viewpoint to illuminate many of the hotly contended issues in modern Islam and to offer a fresh analysis A variety of issues within Islam are discussed in this book including Muslims and modernity Islam Christianity and Judaism approaches to the understanding of the Quran Muslim identity and civil society doctrinal certainty and violent radicalism In each case the author makes use of Karl Popper s theory of critical rationalism to uncover new aspects of these issues and to challenge post modern relativist literalist and justificationist readings of Islam This is a unique perspective on contemporary Islam and as such will be of significant interest to scholars of Religious Studies Islamic Studies and the Philosophy of Religion

Digital Codicology Bridget Whearty,2022-11-15 Medieval manuscripts are our shared

inheritance and today they are more accessible than ever thanks to digital copies online Yet for all that widespread digitization has fundamentally transformed how we connect with the medieval past we understand very little about what these digital objects really are We rarely consider how they are made or who makes them This case study rich book demystifies digitization revealing what it s like to remake medieval books online and connecting modern digital manuscripts to their much longer media history from print to photography to the rise of the internet Examining classic late 1990s projects like Digital Scriptorium 1 0 alongside late 2010s initiatives like Bibliotheca Philadelphiensis and world famous projects created by the British Library Corpus Christi College Cambridge Stanford University and the Walters Art Museum against in house digitizations performed in lesser studied libraries Whearty tells never before published narratives about globally important digital manuscript archives Drawing together medieval literature manuscript studies digital humanities and imaging sciences Whearty shines a spotlight on the hidden expert labor responsible for today s revolutionary digital access to medieval culture Ultimately this book argues that centering the modern labor and laborers at the heart of digital cultural heritage fosters a more just and more rigorous future for medieval manuscript and media studies
