Environmental Hazards and Resilience Dennis J. Parker,Edmund C. Penning-Rowsell,2021-08-26 Building resilience to the world s increasingly damaging environmental hazards has become a priority This book considers the scientific advances which have been made around the world to enhance this resilience Although resilience is not new it is through the idea of resilience that governments organisations and communities around the world are now seeking to address the rapidly increasing losses that environmental hazards cause so that fewer lives are lost and damage is reduced Alternative ideas and approaches have been helpful in reducing loss but resilience offers a fresh and potentially effective means of reducing it further Adopting a scientific approach and scientific evidence is important in applying the resilience idea in hazard mitigation However the science of resilience is at an immature stage of development with much discussion about the concept and how it should be understood and interpreted Building useful theories remains a challenge although some of the building blocks of theory have been developed More attention has been given to developing indicators and frameworks of resilience which are subsequently applied to measure resilience to hazards such as flooding earthquake and climate change *Environmental Hazards and Resilience Theory and Evidence* considers the scientific and theoretical challenges of making progress in applying resilience to environmental hazard mitigation and provides examples from around the world including the USA New Zealand China Bangladesh and elsewhere The chapters in this book were originally published in the *Environmental Hazards*

Department of Printed Books,1969 Education and climate change Samantha Govender,Mncedisi C Maphalala,Dumisani W. Mncube,2025-06-15 The book highlights the critical yet often overlooked role of education in combating climate change It advocates for a transformative educational framework that integrates social emotional learning and interdisciplinary collaboration Traditional education which focuses solely on factual knowledge is deemed insufficient Instead education should foster empathy provide hands on experiences and encourage active engagement in climate solutions The book outlines various ways education can drive climate action such as raising awareness preparing individuals for green jobs empowering communities and fostering innovation in higher education It highlights the interconnectedness of climate change and education particularly for marginalised populations showing how quality education can enhance both mitigation and adaptation strategies while supporting Sustainable Development Goal SDG 4 and SDG 13 Key chapters discuss successful initiatives such as the Keep it Cool Climate Change Education KIC CCE project in South Africa and offer strategies for integrating climate change education into subjects like Natural Sciences and Geography Ultimately the book positions education as a strategic tool for promoting sustainable development and building climate resilience New research findings presented in the book connect education to climate change highlighting education as both a tool to address climate issues

and a domain affected by these issues The book integrates empirical evidence innovative theories and practical examples to ensure intellectual integrity and academic rigour It introduces a unique framework that emphasises social emotional learning action oriented teaching and interdisciplinary collaboration Case studies such as the KIC CCE initiative in South Africa illustrate these concepts The book critiques traditional models and advocates for transformative approaches to climate education aligning with SDG 4 Quality Education and SDG 13 Climate Action It also highlights the significance of teacher preparedness community empowerment gender equality and innovation providing valuable insights for scholars policymakers and practitioners addressing the climate crisis Tourism and Sustainable Development Goals Jarkko Saarinen,2020-06-29

This comprehensive volume comprises some of the best scholarship on sustainable tourism in recent years demonstrating the rich body of past research that provides a fertile and critical ground for studies on the Sustainable Development Goals SDGs by tourism geographers and other social scientists in the future Since the turn of the 1990s many international development and policy making organisations have perceived the tourism industry with its local and regional connections as a high potential tool for putting sustainable development into practice The capacity of tourism to work for sustainable development was highlighted in relation to the United Nations SDGs which were adopted in 2015 The SDGs define the agenda for global development to 2030 by addressing pertinent challenges such as poverty inequality climate change environmental degradation and peace and justice Tourism geographers and allied disciplines have held strong and long term interest in sustainability issues and their chapters in this collection contribute significantly to this emerging and highly policy relevant research field This book was originally published as an online special issue of the journal Tourism Geographies The Saturday Review of Politics, Literature, Science and Art ,1926 **Selected Water Resources Abstracts** ,1978-03
