bursts beyond established boundaries the fact that some states are much more powerful and exercise much more spatial reach than do others and that the political uses of territory in its current usage date back predominantly to seventeenth century Europe rather than being historically transcendental or worldwide The articles in this book are selected from Territory Politics Governance to survey many of the dilemmas and questions that haunt the concept of territory even as its current efflorescence in political discourse ignores them

Handbook of Cities and the Environment Kevin Archer, Kris Bezdecny, 2016-12-30 With an ever growing majority of the world's human population living in city spaces the relationship between cities and nature will be one of the key environmental issues of the 21st Century This book brings together a diverse set of authors to explore the various aspects of this relationship both theoretically and empirically Rather than considering cities as wholly separate from nature a running theme throughout the book is that cities and city dwellers should be characterized as intrinsic in the creation of specifically urban generated socio natures

Cognitive and Linguistic Aspects of Geographic Space D.M. Mark, Andrew U. Frank, 2012-12-06 This book contains twenty eight papers by participants in the NATO Advanced Study Institute ASI on Cognitive and Linguistic Aspects of Geographic Space held in Las Navas del Marqués Spain July 8 20 1990 The NATO ASI marked a stage in a two year research project at the U S National Center for Geographic Information and Analysis NCOIA In 1987 the U S National Science Foundation issued a solicitation for proposals to establish the NCGIA and one element of that solicitation was a call for research on a fundamental theory of spatial relations We felt that such a fundamental theory could be searched for in mathematics geometry topology or in cognitive science but that a simultaneous search in these two seemingly disparate research areas might produce novel results Thus as part of the NCGIA proposal from a consortium consisting of the University of California at Santa Barbara the State University of New York at Buffalo and the University of Maine we proposed that the second major Research Initiative two year multidisciplinary research project of the NCOIA would address these issues and would be called Languages of Spatial Relations The grant to establish the NCOIA was awarded to our consortium late in 1988
