Geography for CAPS, 2011 **Ecotheology** Levente Hufnagel, 2023-01-11 *Ecotheology: Sustainability and Religions of the World* gives a very interesting overview of the frontiers of scientific research in this important multi and transdisciplinary area. Its chapters use ecotheological approaches to discuss the multiple aspects of an environmental crisis from almost every segment of our planet. This book will be very useful for everyone: researchers, teachers, students or others interested in the field who would like to gain some insights into this aspect of our culture.

Education and climate change Samantha Govender, Mncedisi C Maphalala, Dumisani W. Mncube, 2025-06-15 The book highlights the critical yet often overlooked role of education in combating climate change. It advocates for a transformative educational framework that integrates social, emotional learning and interdisciplinary collaboration. Traditional education which focuses solely on factual knowledge is deemed insufficient. Instead, education should foster empathy, provide hands-on experiences and encourage active engagement in climate solutions. The book outlines various ways education can drive climate action, such as raising awareness, preparing individuals for green jobs, empowering communities and fostering innovation in higher education. It highlights the interconnectedness of climate change and education, particularly for marginalised populations, showing how quality education can enhance both mitigation and adaptation strategies while supporting Sustainable Development Goal SDG 4 and SDG 13. Key chapters discuss successful initiatives such as the Keep it Cool Climate Change Education KIC CCE project in South Africa and offer strategies for integrating climate change education into subjects like Natural Sciences and Geography. Ultimately, the book positions education as a strategic tool for promoting sustainable development and building climate resilience. New research findings presented in the book connect education to climate change, highlighting education as both a tool to address climate issues.

and a domain affected by these issues The book integrates empirical evidence innovative theories and practical examples to ensure intellectual integrity and academic rigour It introduces a unique framework that emphasises social emotional learning action oriented teaching and interdisciplinary collaboration Case studies such as the KIC CCE initiative in South Africa illustrate these concepts The book critiques traditional models and advocates for transformative approaches to climate education aligning with SDG 4 Quality Education and SDG 13 Climate Action It also highlights the significance of teacher preparedness community empowerment gender equality and innovation providing valuable insights for scholars policymakers and practitioners addressing the climate crisis

Assessment in Geographical Education: An International Perspective Theresa Bourke,Reece Mills,Rod Lane,2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

Self-directed learning research: An imperative for transforming the educational landscape Elsa Mentz,Thabisile Buthelezi,Josef de Beer,Adri du Toit,Aubrey Golightly,Sarah Gravett,Marietjie Havenga,Anitia Lubbe,Judah P. Makonye,Neal Petersen,Paulinah Phahamane,Jessica Pool,H.J. (Hennie) Steyn,Johannes (Hannes) L. van der Walt,Charl Wolhuter,2016-12-31 This book will benefit specialists in the field of the education sciences It represents significant progress in knowledge production Self directed learning has become increasingly important not only for education in South Africa but also for education sciences in the international arena This is a result of the changing education landscape caused by the demands of the 21st century as well as the rapid change in knowledge

production Learners should be equipped with skills to take responsibility for their own learning New innovative strategies should be incorporated into teaching and learning in order to meet the changing demands in education Traditional teacher centred practices are still the norm in most South African schools and higher education institutions and do not adequately prepare students for lifelong learning in the 21st century The content focuses on the theory behind self directed learning explores strategies such as cooperative learning problembased learning case based teaching and large group teaching that enhance self directed learning and the use of blended learning in a self directed learning environment The book demonstrates how self directed learning can be enhanced in mathematics computer science and life science education and through the use of student tutors for geography Digital technology could for example also be used in innovative ways for education in isiZulu folk poetry The findings are based on original empirical research and a sound theoretical conceptual framework In an environment of rapidly changing knowledge production this book responds to the challenge of how to equip learners with the necessary skills to take responsibility for their own learning The book presents innovative teaching and learning strategies for meeting the changing demands in education Group activities the responsibilities of learners and the obstacles that hinder their learning are analysed and the way in which educators can support them is discussed Educational values such as mutual trust are discussed and self directed assessment is explored This is a timely collective work authored by experts who subscribe to the approach of self directed learning Educators should discover new teaching and learning strategies and value the integration of self directed learning in the classroom

Teaching and Learning for Change

Ingrid Schudel,Zintle Songqwaru,Sirkka Tshiningayamwe,Heila Lotz-Sisitka,2021 Like many national curricula around the world South Africa s curriculum is rich in environment and sustainability content Despite this environmental teaching and learning can be challenging for educators This comes at a time when Sustainable Development Goal 4 via Target 4.7 requires governments to integrate Education for Sustainable Development into national education systems Teaching and Learning for Change is an exploration of how teachers and teacher educators engage environment and sustainability content knowledge methods and assessment practices an exposition of quality education processes in support of ecological and social justice and sustainability The chapters evolve from a ten year research programme led out of the DSI NRF SARChI Chair in Global Change and Social Learning Systems working with national partners in the Fundisa for Change programme and the UNESCO Sustainability Starts with Teachers programme They show the integration of education for sustainable development in teacher professional development and curricula in schools in South Africa They reveal how university based researchers teachers and teacher educators have made theoretically and contextually reasoned choices about their lives and their teaching in response to calls for a more sustainable world in which education must play a role Teaching and Learning for Change will be of interest to education policymakers in government advisors and educators in educational and environmental departments NGOs and other institutions It will also be of interest to teacher educators teachers and researchers in
