

OFFICIAL CORONER'S REPORT

Report of Investigation - Ref.: 01372/21/461/2011
Office of the Coroner/Medical Examiner
Kent Police Department
Attending Coroner: Richard Madigan

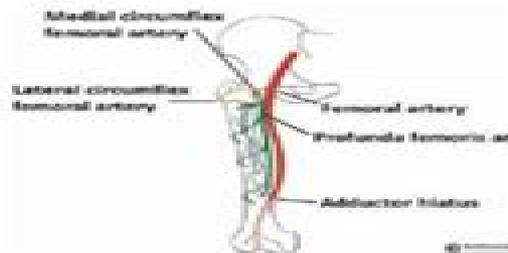

INVESTIGATION SUMMARY

The decedent was brought into the Coroner's Department at **8.52pm on Friday 27th May**. It was reported to me by the personnel who accompanied the decedent that his name was **Stephen Long**, that he was a young man of around **15 years of age**, approximately **5ft 9ins tall**, weighing approximately **9 and a half stone**. He was reported as being in **good physical health at the time of his death** with no obvious signs of illness or injury, other than those linked to the cause of death.

A full post-mortem established that the **victim died from a fatal loss of blood** caused by a **single stab wound to the femoral artery in the upper right thigh**. The angle of the wound suggests an upwards thrust of the blade. Moreover, the entry wound was initially small but the tearing of the skin suggests **the victim may have fallen or leaned forward after the initial cut**, causing his own body weight to force the blade in deeper until the femoral artery was pierced.

The wound is **NOT serrated**, but does widen somewhat as it moves deeper into the thigh, which would suggest a large, smooth bladed knife.

An interesting point to note is that there were **small traces of icing sugar in the wound** which seem to have come from the knife, which would suggest the knife had been used recently **to cut cake or other food item using icing sugar**.
