**Boredom: The Elephant in the Room** Doris Sommer,Robert D. Austin,Alexandra Vuyk,David M. Ndeti,Nicolas Prevelakis,Pier Luigi Sacco,Josefa Ros Velasco,2024-07-16 When cases of domestic violence spiked during the COVID 19 lockdowns terror spread among potential victims while governments that enforced the isolation seemed helpless to address the damages Vulnerable partners children and parents were hostage to possible perpetrators given the risks of retaliation at home and the danger of death by contamination in shelters The alarm raises questions about under examined triggers for violence against others and oneself One common trigger is boredom It is the elephant in the room a known stressor in institutional settings schools prisons and military installations and otherwise out of focus despite the ubiquity of gender based violence Detecting the ravages of boredom in apparently safe domestic settings hints at a range of meanings for the word and a web of personal and collective dysfunctions including anxiety depression feelings of worthlessness and anomie Conventional remedies for these challenges do not address the escalating rates of violence to oneself and to others Their evident ineffectiveness during the crisis laid bare structural flaws in standard human development strategies which span home and school environments the law and approaches to mental health A major flaw has been the narrow perspectives of one or another discipline when the dangers are interrelated and demand multidisciplinary approaches Chronic violence and alarming rates of depression before during and after the pandemic show failures of predictable perspectives and their recommendations even in normal conditions The question of how authorities should react to harm done begs the question of how to prevent harm from happening Prevention rather than punishment for crimes or treatment for pathologies has become a preferred approach for both legal and clinical interventions To stop violence before it erupts requires investigation into its causes because treating the effects of aggression evacuating victims punishing perpetrators counselling patients addresses symptoms rather than diseases Why was the lockdown a time of increased domestic violence What accounts for recent spikes in teen suicides What

are the existing and possible tools for measuring boredom Answers from experts stay within foreseeable observations about the loss of jobs the increase of alcoholism social media addiction and psychological stress These familiar answers do not lead beyond the description of pathological patterns But different approaches may follow from attending to the under examined danger of having nothing to do *Economic Challenges of Pension Systems* Marta Peris-Ortiz, José Álvarez-García, Inmaculada Domínguez-Fabián, Pierre Devolder, 2020-03-20 This book examines the major economic challenges associated with the sustainability of public pensions specifically demographic change labor market relations and risk sharing The issue of public pensions occupies the political and economic agendas of many major governments in the world International organizations such as the World Bank and the OECD warn that the economic changes driven by an aging society negatively affects the sustainability of pension systems This book analyzes different global public pension systems to offer policies methods and tools for sustainable public pensions Real case studies from France Sweden Latin America Algeria USA and Mexico are featured *Mercer Guide to Social Security and Medicare* J.
