It's a common mistake to think that the only way to get a fan cart to move is to push it. In fact, you can get a fan cart to move by pulling it. This is because the fan cart has a fan that blows air out of it. This air has momentum, and when it is blown out of the fan cart, it carries away some of the fan cart's momentum. This is why the fan cart moves in the opposite direction of the air that is blown out of it.

But there is one more thing to think about. The fan cart has a fan that blows air out of it. This air has momentum, and when it is blown out of the fan cart, it carries away some of the fan cart's momentum. This is why the fan cart moves in the opposite direction of the air that is blown out of it. This is why the fan cart moves in the opposite direction of the air that is blown out of it.

From the information, the fan cart will move in the opposite direction of the air that is blown out of it. This is because the fan cart has a fan that blows air out of it. This air has momentum, and when it is blown out of the fan cart, it carries away some of the fan cart's momentum. This is why the fan cart moves in the opposite direction of the air that is blown out of it.
