Federal Register ,2013 **Hollyworld** ,1993 *Science on American Television* Marcel Chotkowski,2024-05-31 As television emerged as a major cultural and economic force many imagined that the medium would enhance civic education for topics like science And indeed television soon offered a breathtaking banquet of scientific images and ideas both factual and fictional Mr Wizard performed experiments with milk bottles Viewers watched live coverage of solar eclipses and atomic bomb blasts Television cameras followed astronauts to the moon Carl Sagan through the Cosmos and Jane Goodall into the jungle Via electrons and embryos blood testing and blasting caps fictional Frankensteins and chatty Nobel laureates television opened windows onto the world of science But what promised to be a wonderful way of presenting science to huge audiences turned out to be a disappointment argues historian Marcel Chotkowski LaFollette in *Science on American Television* LaFollette narrates the history of science on television from the 1940s to the turn of the twenty first century to demonstrate how disagreements between scientists and television executives inhibited the medium s potential to engage in meaningful science education In addition to examining the content of shows she also explores audience and advertiser responses the role of news in engaging the public in science and the making of scientific celebrities Lively and provocative *Science on American Television* establishes a new approach to grappling with the popularization of science in the television age when the medium s ubiquity and influence shaped how science was presented and the scientific community had increasingly less control over what appeared on the air

Braves game you've crossed paths with John Malone. You just didn't know it. John Malone remains a stranger to most people though millions have been touched by the technologies and content he made possible. In *Born to Be Wired* this legendary cable cowboy shares stories from behind the scenes of the most transformative deals in media entertainment and technology. He recounts the extraordinary saga of how America was wired how a single copper strand evolved from a rural TV antenna service into a high speed backbone powering the internet and clearing the path for Amazon Facebook and Google. Malone offers an insider's account of launching television's first cable networks including Discovery TBS QVC and BET and the strategy behind era defining mergers from Warner Bros Discovery to Live Nation Entertainment. His Liberty Media ventures including Formula One have delivered long term returns often compared to Berkshire Hathaway. More than a business story this is a personal reflection from a quiet kid with a mechanic's curiosity to a media visionary confronting the costs and consequences of disruption in an industry he helped reshape. Trained at the storied Bell Labs and gifted with a mathematical mind Malone saw patterns in complexity. Where others saw chaos he saw systems and reconfigured companies with the precision of an engineer unlocking value no one else could see. Sweeping revealing and deeply human *Born to Be Wired* offers a rare glimpse into the logic and the life behind the screen.
