Teaching in the Global Business Classroom Carol Dalglish, Peter Evans, 2010-01-01 This book is an excellent resource for university lecturers facing the challenges of working in multicultural classrooms as it examines all aspects raised from the different perspectives of the stakeholders. This book adds both research and practical examples to an already established approach to learning both in schools and universities. Whilst aimed at university business lecturers, secondary teachers and trainee teachers would also gain from the reflection of the impact of international students in relation to teaching and learning.

Carole Marshall Professional Development in Education The text is succinct, easy to follow and broken up with helpful subtitles. This book is recommended for all new higher education teachers and demonstrators and as a resource for both lecturer training and for continuing professional development purposes.

Barbara Chandler Studies in Higher Education One of the great challenges for teachers in many tertiary institutions is to effectively understand the complex multicultural classroom both as a consequence of increasing international student mobility and as a result of the raised cultural diversity of domestic populations. Even more important is the need to devise practical and effective strategies that aid learning in growing international contexts.

Carol Dalglish and Peter Evans in Teaching in the Global Business Classroom provide both and have written an excellent and invaluable guide that will help to avoid the mono-culturalism and Anglo-Americanism of many current approaches which act as barriers both to more effective learning and enhanced performance in the global business environment.

Business Policy and Participative Decision-Making Wilson Essien Ph.D., 2019-07-08 The glue between efficient productivity and profitability is great decision making I do not think that a farmer has ever sown rice and harvested corn In computers the most common language is GIGO meaning garbage in garbage out Usually the decisions we make are our personalities and yet very few people accept responsibility for their actions their failures in business or in any endeavor in which they have failed They desire to blame

others without remembering GIGO I have articulated the mystery that surrounds the lone decision maker or the CEO who enjoys lonely decision making and blaming his or her failures on the engineer or the accountant in his company The new name for decision making is participative decision making In this the senior officers take part but separately the engineers accountants supervisors workers and maintenance people form another group Both platforms must have a dialogue format there must be a writer or clerk a vote taken on each discussion for its authenticity or viability and in the end the senior officers must compare their notes with the second group so that amendments can be made where necessary The final product is now ready to be presented before the board of directors as a formal decision for the company In a smaller company this activity stops with the owner but the owner must understand that two heads are usually better than one The CEO and his group must not be taken over by egos the only time for pride in business is when business is doing well financially Even then business needs a lot of careful activity because pride goes before a fall It is good to entrust the CEO with the decision making responsibility but it is the biggest risk a business can take because business is a collection of ideas Therefore it a discipline of collective learning and inquiry Any student manager or business owner who wants to use participative decision making skills in his or her business or as a consultant in participative decision making should attend a workshop at least twice and read about participative decision making thoroughly and practice it from case studies
