Turk, Laura J. Dull, Robert Cohen, Michael R.

Stoll, 2014-03-05 Teaching Recent Global History explores innovative ways to teach world history beginning with the early 20th century. The authors' unique approach unites historians, social studies teachers, and educational curriculum specialists to offer historically rich, pedagogically innovative, and academically rigorous lessons that help students connect with and deeply understand key events and trends in recent global history. Highlighting the best scholarship for each major continent, the text explores the ways that this scholarship can be adapted by teachers in the classroom in order to engage and inspire students. Each of the eight main chapters highlights a particularly important event or theme, which is then complemented by a detailed discussion of a particular methodological approach. Key features include: An overarching narrative that helps readers address historical arguments; Relevant primary documents or artifacts plus a discussion of a particular historical method well suited to teaching about them; Lesson plans suitable for both middle and secondary level classrooms; Document-based questions and short bibliographies for further research on the topic. This invaluable book is ideal for any aspiring or current teacher who wants to think critically about how to teach world history and make historical discussions come alive for students.

States, Markets and Wars in Global History Giulio Sapelli, 2023-09-30 This wide-ranging book focuses on the economic and political changes that have taken place between the advent of globalization and the COVID-19 pandemic and assesses how this may bring about a profound reconfiguration of the global political system. Sapelli considers a range of developments in different spheres, from international to national politics, military aggressions, and worldwide political trends such as the rise of populism, to illuminate the moment of neoliberal crisis in which we now live. He argues that Europe and its institutions, in particular, no longer demonstrate a model of diplomacy and statesmanship with the rise of technocratic structures and elitism, reflecting how an ideal of global convergence towards liberalism and democracy no longer holds true. The book then considers how a new international order based on the reason of state can be brought about by global cooperation between the US, Russia, and China, along with a return to properly regulated finance and a renewed focus on community in the wake of the coronavirus pandemic. The book will be of interest to those working in international economics and international relations, as well as academics of economic history and political economy.

[Making the World Global](#) Isaac A. Kamola, 2019-06-07 Following World War II, the American government and philanthropic foundations fundamentally remade American universities into sites for producing knowledge about the world as a collection of distinct nation-states. As neoliberal reforms took hold in the 1980s, visions of the world made popular within area studies and international studies found themselves challenged by ideas and educational policies that originated in business schools and international financial institutions. Academics within these institutions reimagined the world instead as a single global market and higher education as a commodity to be bought and sold. By the 1990s, American universities embraced this language of globalization and globalization eventually became the organizing logic of higher education. In *Making the World Global*, Isaac A. Kamola examines how the relationships among universities, the American state, philanthropic organizations, and international financial

institutions created the conditions that made it possible to imagine the world as global Examining the Center for International Studies Harvard Business School the World Bank the Social Science Research Council and NYU Kamola demonstrates that how we imagine the world is always symptomatic of the material relations within which knowledge is produced
