Globalization And International Security An Overview:

Globalization and International Security Teresa F. Rodrigues,Rafael García Pérez,Susana de Sousa Ferreira,2014-12
In a globalised world the international economic crisis that started in 2008 has led to structural changes in the international system and in the balance of power in several terms from a unipolar to a multipolar sphere from the post modern state to the sovereign state from unrestricted integration in the global economy to the independent management of economy itself and from trade integration at a global level to the fragmentation of the economic space in regional areas In short the transition from a unipolar to a multipolar trend seems to be reflected in the increasing fragmentation of the economic space and has repercussions in the strategic space and security These changes are also affecting the discourse that explains the process of globalisation and the appropriate strategies to act in it Maybe until 2007 we could talk about a Western model But now this is a lot more questionable and we might even talk of an outright censorship The rise of emerging powers leads to the construction of a new narrative adapted to the values that these countries embody among them the strength and suitability to the principles derived from the sovereign state A scenario where it is increasingly difficult to adopt the tenets of globalising governance Our aim is to overview all these structural transformations and assess those changes in the different areas taken into account in this book We also aim to address possible alternatives which may allow a coordinated management of certain risks although regionally differentiated We hope this book can be useful to the academic community both graduate and post graduate students professors and researchers of International Relations and Political Science Armed Forces and other security services as well as decision makers in the areas of economics social and security public policies and other readers can find in this book an overview of some major contemporary challenges resulting from the link between security and the globalisation process

Globalization and International Security Teresa F. Rodrigues,Rafael García Pérez,Susana de Sousa Ferreira,2014-01-01 In a globalized world the international economic crisis that started in 2008 has led to structural changes in the international system and in the balance of power in several terms from a unipolar to a multipolar sphere from the post modern state to the sovereign state from unrestricted integration in the global economy to the independent management of economy itself and from trade integration at a global level to the fragmentation of the economic space in regional areas In short the transition from a unipolar to a multipolar trend seems to be reflected in the increasing fragmentation of the economic space and has repercussions in the strategic space and security These changes are also affecting the discourse that explains the process of globalization and the appropriate strategies to act in it Maybe until 2007 we could talk about a Western model But now this is a lot more questionable and we might even talk of an outright censorship The rise of emerging powers leads to the construction of a new narrative adapted to the values that these countries embody among them the strength and suitability to the principles derived from the sovereign state A scenario where it is increasingly difficult to adopt the tenets of globalizing governance Our aim is to overview all these structural

transformations and assess those changes in the different areas taken into account in this book We also aim to address possible alternatives which may allow a coordinated management of certain risks although regionally differentiated We hope this book can be useful to the academic community both graduate and post graduate students professors and researchers of International Relations and Political Science Armed Forces and other security services as well as decision makers in the areas of economics social and security public policies and other readers can find in this book an overview of some major contemporary challenges resulting from the link between security and the globalization process *The Palgrave*
