Acker, 2011 My students are for the most part potentially very good writers However when I get these students their lab report writing skills are quite limited and therefore are very poor Focus for doing labs thus far in their science career has been how well they can perform the lab from verbal instructions not written instructions The students have a difficult time reading and understanding what the protocol wants them to do and they have an even more difficult time explaining what they performed during the lab activity in a lab report This project investigated how well the students discussed their course of action after performing the lab activity in a written report The students were given written lab protocols and were expected to follow the procedure and make observations along the way The labs were all completed in one 45 minute class period The students were then given one day in class to work on their lab report following the lab report rubric Appendix A Data collection for this project not only included lab report writing but what the students comfort levels were in different elements of the lab how well they reviewed their own work how well they reviewed other peer s work and how they felt about the whole lab report writing process throughout the year Several teachers were also asked to evaluate how well these particular students processed and followed directions in their classrooms as well The resulted indicated that by implementing a peer review session into the lab report writing process the report score significantly improved The students who struggled at the beginning of the process were now completing quality lab reports in half the time and the peer review rubrics were being scored with the highest marks Because of these positive outcomes I know that peer review is an integral part of the learning process to produce quality lab reports and I will continue to conduct this practice in my classroom in years to come

Classroom Assessment James H. McMillan, 2004 This book provides prospective and current teachers with a concise non technical and practical guide to conducting a full range of high quality classroom assessments The text emphasizes assessment in the context of the realities of teaching and teacher decision making as well as on how assessment is integrated with instruction Assessment methods are integrated with instruction and presented according to when teachers evaluate students before during and after an instructional unit and the learning targets that are measured There is considerable emphasis on the nature of learning targets and how different assessments are most appropriate for different targets For each assessment technique suggestions for effective practice are presented with examples and case studies There are separate chapters on contemporary assessment techniques and issues such as performance and portfolio assessments as well as separate chapters on assessing affective targets and students with disabilities included in the regular classroom A balance is provided with traditional forms of assessment and the need for teachers to administer interpret and use results from standards based large scale assessments and other standardized tests **The American Biology Teacher**, 2007 **An**

Introduction to Standards-Based Reflective Practice for Middle and High School Teaching Elizabeth Spalding, Jesus Garcia, Joseph A. Braun, 2010-03-09 This easy to use introductory guide to teaching in contemporary middle and high schools provides teachers with the tools to become reflective practitioners It shows pre and inservice teachers how to use standards to choose instructional materials and methods that are appropriate with particular students at a particular time in a particular setting for a particular purpose While the authors are specialists in English and social studies this resource is appropriate for aspiring middle and high school teachers of any subject With a personal voice that will appeal to readers this book Links directly to the most recent version of standards for beginning teachers published by the Council of Chief State School Officers CCSSO Illustrates how teachers can be reflective about rather than reactive to standards Features an autobiographical approach to help readers understand how prior educational experiences may shape their future teaching Contains numerous reflective vignettes by practicing teachers

Beyond Standardized Testing George W. Elford, 2002-10-23 Here s a fresh idea from an experienced testing professional that addresses the problem of the overuse of standardized testing Elford argues that so called test based reform has given rise to the cram curriculum and turned schools into test prep centers Overlooked are the classroom teachers who observe the actual work of students and are the primary and richest source of information on learning The author lays out a better approach to accountability using standards teacher judgments and the tools of the information age This is not an attack on standardized testing which supplies the only interpretable information the public has been able to attain Rather it recommends comprehensive computer based systems that link every teacher and classroom into their school district s data warehouse This system supports and utilizes the richest source of accountability information the presently un tapped knowledge in the minds of teachers At the heart of the system are standardized teacher judgments related to content and performance standards and supported by standards based scoring rubrics that are integrated into a computer based instructional management information system Among the advantages the system offers are Students are graded on quality of their work not how they compare with other students The school or school district becomes the primary source of accountability information instead of the state Provides better information for college admissions Provides employers with a record to use that shows the link between school and work The technology for such a system is ready and waiting This book defines the urgent need for a computer based instructional information system to which every teacher is linked and calls upon innovative school leaders to embrace the idea
