[Hospital End User Computing in Japan: How to Use FileMaker Pro with Hospital Information Systems](#) Shunji Wakamiya, Kazunobu Yamauchi, Hiroyuki Yoshihara, 2012-11-11. Organizational computing has been critical to the development of medical informatics. Many end-user applications (EUAs) such as FileMaker Pro have been applied to support medical staff work at hospitals in Japan recently. This e-book describes how to use FileMaker Pro with hospital information systems (HISs). EUAs are described with relation to tools used for development, their functions, coordination methods with HIS, how to use them, their effectiveness, and their problems. While not all of the applications fulfill complete requirements for RASIS and are not established, they give us new perspectives regarding HISs. This e-book also provides readers with various suggestions on how to use HISs more effectively, how to coordinate EUAs with HIS, how to manage end-user applications, and how to achieve clinical effectiveness with EUAs. This volume is specialized in the use of FileMaker Pro at hospitals and all of the developers of FileMaker Pro systems. The respective authors are medical doctors at various departments of hospitals, in contrast to conventional developers who are usually unfamiliar with medical information requirements. These two features make this e-book more clinically significant and facilitate end users to handle HISs more easily.

The Book of Filemaker 6 Chris Kubica, 2003. This complete reference to FileMaker Pro takes developers at all levels beyond the user manual to create robust and dynamic database systems from the ground up. It begins with an introduction to the FileMaker Pro development environment and relational databases in general but also covers advanced topics.

[FileMaker Pro 4](#) Alex Kennedy, 1999. This is a guide to FileMaker Pro 4.0, a cross-platform relational database management system that operates on PCs rather than huge mainframe systems. The book introduces and explains how FileMaker Pro databases can be integrated with and published on the Web. All examples have been updated for version 4.0 and there is updated material on networking to take into account Web and Windows NT support. Also, five chapters on Web publishing are new to this edition.
