Klinger, 2018-01-15 Rare Earth Frontiers is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation

Critical Issues in Contemporary China Czeslaw Tubilewicz, 2016-12-12 Critical Issues in Contemporary China Unity Stability and Development comprehensively examines key problems crucial to understanding modern day China Organized around three interrelated themes of unity stability and development each chapter explores distinct issues and debate their significance for China domestically and for Beijing's engagement with the wider world While presenting contending explanatory approaches contributors advance arguments to further critical discussion on selected topics Main issues analysed include political change military transformation legal reforms economic

development energy security environmental degradation food security and safety demographic trends migration and urbanization labour unrest health and education social inequalities ethnic conflicts Hong Kong's integration cross Strait relations Given its thorough and up to date assessment of major political social and economic challenges facing China this fully revised and substantially expanded new edition is an essential read for any student of Chinese Studies Planning and Design for Sustainable Urban Mobility Un-Habitat,2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world's leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change **Resisting Domination in Palestine** Alaa Tartir,Timothy Seidel,Tariq Dana,2024-04-04 This meticulously curated edited volume presents an assemblage of insightful critical and contemporary perspectives on how Israeli domination has been sustained and reproduced in new forms and means using various mechanisms and techniques of control coloniality and settler colonialism Based on original empirical fieldwork the contributors to this book adopt interdisciplinary and decolonial approaches in their examination of the intricate functions and structures of domination that permeate Palestinian life by illuminating the power dynamics at play and revealing the mechanisms that sustain the settler colonial regime This book identifies sites of colonial control and domination exerted on Palestine by Israel and demonstrates how these sites of control are also sites of Palestinian resistance The first section explores the political sites of control by focusing on governmentality institutions and technologies and mechanisms of control including how Israel manages access to health life and death The second section

examines the economic mechanisms of exploitation dispossession and development including banking taxation and the relationships between finance capital and military occupation The third section turns attention to environmental sites of control focusing on land indigeneity space and racial capitalism Finally section four scrutinizes the intellectual sites of control highlighting how norms narratives and knowledge production perpetuate domination
