Statistics Robin H. Lock, Patti Frazer Lock, Kari Lock Morgan, Eric F. Lock, Dennis F. Lock, 2016-11-22 *Statistics Unlocking the Power of Data* 2nd Edition continues to utilize these intuitive methods like randomization and bootstrap intervals to introduce the fundamental idea of statistical inference. These methods are brought to life through authentically relevant examples enabled through easy to use statistical software and are accessible at very early stages of a course. The program includes the more traditional methods like t tests, chi square tests etc but only after students have developed a strong intuitive understanding of inference through randomization methods. The focus throughout is on data analysis and the primary goal is to enable students to effectively collect data, analyze data and interpret conclusions drawn from data. The program is driven by real data and real applications.

Educational Leadership in Becoming Nuraan Davids, Yusef Waghid, 2016-08-25 *Educational Leadership in Becoming* reconsiders educational leadership in its current forms and presents a more plausible form of educational leadership to contend with the complexities currently found in universities and schools. Much of the literature in vogue concerning educational leadership ranges from transactional to transformative representations of the concept in relation to educational management and policy, curriculum inquiry and pedagogical action. The primary aim of this book is to revisit some of the dominant understandings of educational leadership and to offer an extended view of the practice along the lines of potentiality and becoming. Davids and Waghid argue that all current forms of educational leadership are insufficient to enact responsible human action particularly when it comes to addressing the combined issues of globalisation and equitable redress and transformation whether in relation to leading schools or universities. The primary objective of the book is to draw on the Agambian notion of becoming in order to show that an educational leadership in becoming is better placed to not only address the myriad challenges besetting education but to also enhance the potential of leadership in action. The book addresses an international audience by analysing conceptions of transformative leadership and should be read by anyone who is interested in education and educational leadership as well as the impact of neoliberal agendas on education and society. It should also appeal to those interested in the philosophy of education.

Measurement Invariance Rens Van De Schoot, Peter Schmidt, Alain De Beuckelaer, 2015-10-05 Multi item surveys are frequently used to study scores on latent factors like human values, attitudes and behavior. Such studies often include a comparison between specific groups of individuals either at one or multiple points in time. If such latent factor means are to be meaningfully compared the measurement structures including the latent factor and their survey items should be stable across groups and/or over time that is invariant. Recent developments in statistics have provided new analytical tools for assessing measurement invariance (MI). The aim of this special issue is to provide a forum for a discussion of MI covering some crucial themes: 1 ways to assess and deal with measurement non invariance, 2 Bayesian and IRT methods employing the concept of approximate measurement invariance and 3 new or adjusted approaches for testing MI to fit

increasingly complex statistical models and specific characteristics of survey data The special issue started with a kick off meeting where all potential contributors shared ideas on potential papers This expert workshop was organized at Utrecht University in The Netherlands and was funded by the Netherlands Organization for Scientific Research NWO VENI 451 11 008 After the kick off meeting the authors submitted their papers all of which were reviewed by experts in the field The papers in the eBook are listed in alphabetical order but in the editorial the papers are introduced thematically Although it is impossible to cover all areas of relevant research in the field of MI papers in this eBook provide insight on important aspects of measurement invariance We hope that the discussions included in this special issue will stimulate further research on MI and facilitate further discussions to support the understanding of the role of MI in multi item surveys
