high school students that mathematical functions are relevant to their everyday lives In this volume practical questions that
confront every classroom teacher are addressed using the latest exciting research on cognition teaching and learning How
Students Learn History Mathematics and Science in the Classroom builds on the discoveries detailed in the bestselling How
People Learn Now these findings are presented in a way that teachers can use immediately to revitalize their work in the
classroom for even greater effectiveness Organized for utility the book explores how the principles of learning can be applied
in teaching history science and math topics at three levels elementary middle and high school Leading educators explain in
detail how they developed successful curricula and teaching approaches presenting strategies that serve as models for
curriculum development and classroom instruction Their recounting of personal teaching experiences lends strength and
warmth to this volume The book explores the importance of balancing students knowledge of historical fact against their
understanding of concepts such as change and cause and their skills in assessing historical accounts It discusses how to build
straightforward science experiments into true understanding of scientific principles And it shows how to overcome the
difficulties in teaching math to generate real insight and reasoning in math students It also features illustrated suggestions
