Term 2: Mechanical Systems

Theme: Creating a Mechanical Toy Using Linkages or Gears

Case Study: The Toy Maker in Rural South Africa

In a small rural village in the Eastern Cape, a local engineer named Thabo creates toys using recycled materials. Many of his customers are local children whose families cannot afford to buy expensive toys. Thabo uses simple mechanical systems—like levers, gears and linkages—to make toys that move. He is passionate about using mechanical systems to bring joy and education to children. However, Thabo struggles with designing toys that are both fun and safe for children while using low-cost materials.

Mini PAT Overview

You are a young engineer tasked with helping Thabo design and make a new mechanical toy. The toy must use a mechanical system (gears, levers, coils or linkages) to produce movement. It must be:

- safe to use
- able to demonstrate mechanical movement clearly
