The Executive's How-To Guide to Automation George E. Danner, 2019-01-31

From driverless cars to pilotless planes many functions that have previously required human labor can now be performed using artificial intelligence

For businesses this use of AI results in reduced labor costs and even more important creating a competitive advantage

How does one look at any organization and begin the work of automating it in sensible ways

This book provides the blueprint for automating critical business functions of all kinds

It outlines the skills and technologies that must be brought to bear on replicating human like thinking and judgment in the form of algorithms

Many believe that algorithm design is the exclusive purview of computer scientists and experienced programmers

This book aims to dispel that notion

An algorithm is merely a set of rules and anyone with the ability to envision how different components of a business can interact with other components already has the ability to work in algorithms

Though many fear that the use of automation in business means human labor will no longer be needed the author argues that organizations will re-purpose humans into different roles under the banner of automation

not simply get rid of them He also identifies parts of business that are best targeted for automation This book will arm business people with the tools needed to automate companies making them perform better move faster operate cheaper and provide great lasting value to investors
