

**Business growth strategy**

Business growth strategy is a plan that outlines how a business will increase its sales, revenue, and market share over a period of time. It is a key component of a company's overall business plan and is essential for long-term success. There are several types of business growth strategies, each with its own advantages and disadvantages. The most common types are market penetration, product development, market expansion, and diversification. Market penetration involves increasing sales in existing markets, while product development involves creating new products for existing markets. Market expansion involves entering new markets, and diversification involves entering new markets with new products. Each strategy has its own risks and rewards, and businesses should carefully consider their options before choosing a growth strategy.

*Data-Driven Decision Making in Fragile Contexts* Alexander Hamilton,Craig Hammer,2017-06-16 The need for evidence based decision making at all levels of government is perhaps greatest in fragile settings Data deficiencies contribute to state fragility and exacerbate constraints on the capacity to provide basic services public security and the rule of law The lack of robust good quality data can also have a disabling effect on government efforts to manage political conflict Indeed the lack of data can worsen conflict since violent settings pose substantial challenges to knowledge generation capture and application The development of sustainable and professional data literate stakeholders who are able to produce and increase the quality and accessibility of official statistics can help to improve development outcomes Good quality and reliable statistics are required to track the progress of development policies through the monitoring of performance indicators and targets and to ensure that public resources are achieving results Although reliable data alone cannot have a transformative effect without the right contextual incentives they constitute an essential prerequisite for greater accountability and more efficient decision making Data Driven Decision Making in Fragile Contexts Evidence from Sudan explores methods and insights for data collection and use in fragile contexts with a focus on findings from Sudan It begins by posing several questions on the political economy of data and then sets out a framework for assessing the validity reliability and potential impact of data on decision making in fragile settings It then provides insights regarding the challenges associated with data driven decision making in Sudan derived from the 2014 15 United Kingdom s Department for International Development Sudanese household survey Featured are data driven analyses of diverse topics from public service delivery to the interplay of governance trust and state legitimacy As the data revolution and the advent of the Sustainable Development Goals herald an increasing need to solicit the perceptions and experiences of program beneficiaries the impetus to develop and deploy good quality survey instruments will increase This volume provides an important proof of concept that this type of endeavor is both feasible and useful in fragile contexts and in combination with other important data collection tools can be effectively utilized

to enrich the evidence base of decision making in these settings
