

You are invited to submit a proposal to conduct research and analysis to develop criteria and recommendations for identifying potential target states for the Ford Foundation's U.S. grant-making efforts.

Introduction and Context

The Ford Foundation recently completed a comprehensive review that led to the formation of seven Thematic Areas (TAs) that organize our work in the U.S. and globally. The TAs are not designed as silos; they are entry points for work in each region where Ford works and they are meant to be harnessed and combined in specific contexts and conditions. Our seven Thematic Areas continue to hone their focus, including which geographies they might target and how overlapping priorities in places can contribute to building social justice infrastructure. More detail on the Thematic Areas can be found in Appendix A.

Our recent review included consideration of how the Ford Foundation's various activities in the U.S. could compose a more coherent strategy. Given our long history of work in both cities and states, how could we better align our place-based grant-making? In other words, individual program officers support different pieces of social justice infrastructure in states, but could we work differently and more effectively build that ecosystem?

Given the magnitude of the problems we seek to address, we are especially interested in high-leverage opportunities, where multiple TAs could focus their efforts, such as set of states that could build broader momentum at the national level. At the same time, we recognize that this will require new ways of working within Ford and that the structure and existing ways of working may not allow for the type of collaboration we imagine is necessary.

Key Concepts and Questions

As the foundation has re-aligned itself to focus more squarely on inequality and developed new tools and approaches to support Thematic Areas, a number of key concepts and questions animate this invitation for proposals:
