

Smallworld™ Global Transmission Office

Managing Pipeline Assets and Networks

GE's Smallworld Global Transmission Office (GTO) provides operators with a powerful and comprehensive fit-for-purpose pipeline data model, a set of geospatial business applications, and integrity management and analysis tools that are designed to integrate with existing operators' business processes. Our unique approach of having a pre-configured and pre-integrated spatial solution that is sustainable is a key benefit for operators. GTO is a proven scalable solution that supports small to very large operators with large geographic territories.

Smallworld Global Transmission Office's approach to implementation with a pre-configured and pre-integrated application allows for significant reduction in implementation time compared to traditional customized solutions. Using this solution has proven to reduce implementation time and provide a faster return on investment by allowing users to perform their daily business processes more efficiently.

Smallworld Global Transmission Office provides a single source solution and focuses on business issues, not IT issues:

- Maintain and manage complete and complex spatial asset networks throughout the pipeline asset lifecycle since the applications are integrated into the operator's business processes.
- Experience a single user environment that has 22+ business, analysis, data quality, and user productivity tools to support engineering, asset management and operational business processes.
- Enable standardization utilizing an industry data model that supports fundamental pipeline operations and integrity work processes.
- Improve productivity for risk and integrity management.

Solution Strength

The Smallworld Global Transmission Office suite is a market-leading solution backed by the experience of more than 120 gas utilities worldwide that use Smallworld GTS. Smallworld Global Transmission Office is a set of software business applications used by the pipeline operators to document, plan, operate, assess and manage their networks. Users can have a complete view of assets, linear references and integrity data from a single source (the record of truth), providing faster access to information and reducing training requirements. Smallworld Global Transmission Office holds accurate up-to-date network information to effectively control the deployment of the critical infrastructure and integrity data on which all end users depend.

Customer Benefits

- Up to 25% reduction in data maintenance costs through the usage of automated tools that optimize GIS technician productivity
- Up to 25% reduction in centerline correction, utilizing powerful centerline correction tools that manage hundreds of thousands of data points
- Up to 20% productivity improvements in loading and aligning 3D data through integrated data import, alignment and inspection management tools
- Up to 25% reduction in Class/HC A analysis using powerful and accurate analysis tools that meet the 49 CFR 192.5, 49 CFR 192.603 and 49 CFR 195.452 regulations
- Up to 30% data collection productivity improvement through integrated and streamlined data collection processes
- Increased confidence in data and analysis through integrated processes, data currency, accuracy, traceability and quality
