General Dynamics F-111 'Aardvark' AM Thornborough, Anthony M. Thornborough, 2010-07-29 The iconic General Dynamics F 111 Aardvark a medium range interdictor tactical strike strategic bomber reconnaissance and electronic warfare aircraft was one of the more controversial jets ever to fly Yet despite its inauspicious beginnings it became a highly effective under the radar bomber As a result of a poorly planned development specification both the Navy and Air Force were committed much against their will to a Tactical Fighter Experimental TFX program which called for a single aircraft the F 111 to fulfill both a Navy fleet defense interceptor requirement and an Air Force supersonic strike aircraft requirement This was impossible to achieve especially since planners placed priority upon the Air Force requirement and then tried to tailor this heavy aircraft to the constraints of carrier based naval operations The abortive naval aircraft the F 111B was never placed in production whilst the Air Force aircraft which was produced in a variety of models had numerous problems and only the F 111F actually fulfilled the original TFX design specification This was less the fault of General Dynamics than that of the civilian planners in the Pentagon whose cost effective inclinations produced the major aeronautical fiasco of the 1960s and a costly one at that Acclaimed author Anthony M Thornborough brings the entire F 111 story into one Datafile looking in depth at all of the variants of the F 111 its difficult birth its poor combat debut in the Vietnam War and its final maturity into a potent weapons delivery system This new work will include hitherto unpublished photographs technical diagrams and color profiles which tell the whole story of this incredible machine

General Dynamics F-111 Aardvark Miller, **F-111 Aardvark** John Gourley, 2021-02-28 The General Dynamics F 111 was one of aviation history's most promising planes when it came out in the early 1960s Despite a rocky service career political changes in how the military acquired its weaponry and the addition of too much new technology the plane provided a credible frontline deterrent to NATO in the Cold War era and was used to great effect in the Vietnam War and Operation Desert Storm Many of the challenges faced by putting the F 111 with all of its new systems into service are now accepted as a normal outfit in modern fighter aircraft The F 111 had a lot of bad publicity but in

the end the F 111 did its job extremely well Although the Navy did not accept the F 111B model the Grumman F 14 Tomcat became a success resulting in large part from the F 111B experience and tests it did accomplish with the radar and missile systems *General Dynamics F-111 Aardvark* ,2019 California Warbird Survivors 2002 Harold A. Chambers,2000 Established in 1917 as the nation s first civil aeronautics research laboratory under the National Advisory Committee for Aeronautics NACA Langley was a small laboratory that solved the problems of flight for military and civil aviation Throughout history Langley has maintained a working partnership with the Department of Defense U S industry universities and other government

agencies to support the defense of the nation with research During World War II Langley directed virtually all of its workforce and facilities to research for military aircraft Following the war a balanced program of military and civil projects was undertaken In some instances Langley research from one aircraft program helped solve a problem in another At the conclusion of some programs Langley obtained the research models for additional tests to learn more about previously unknown phenomena The data also proved useful in later developmental programs Many of the military aircraft in the U S inventory as of late 1999 were over 20 years old Langley activities that contributed to the development of some of these aircraft began over 50 years prior This publication documents the role from early concept stages to problem solving for fleet aircraft that Langley played in the military aircraft fleet of the United States for the 1990 s *General Dynamics F-111* Jay Miller, 1981

F-111 Aardvark in Action David Doyle, 2019-11-18 The F 111 which ultimately proved to be a very capable fighter bomber for the US and Australian Air Forces was born out of the desire of Secretary of Defense Robert Strange McNamara to force the USAF and the Navy to use a single aircraft for all tactical missions strike close air support air superiority and fleet air defense The initial effort called the Tactical Fighter Experimental or TFX was based largely on the Air Forces requirements with a few adaptations to approximate the Navy s desires The initial Air Force version of the aircraft would be the F 111A while the Navy variant was the F 111B Although General Dynamics was the prime contractor the company had little recent experience in building carrier borne aircraft and turned to Grumman as a subcontractor for the assembly and testing of the Navy planes The F 111 itself the first production variable wing geometry aircraft would have a remarkable 30 year service history During that time the aircraft was produced in five models and modified and rebuilt into three additional models Illustrated with over 200 color and b w photos
