

Discussion on EVA Performance Evaluation Standard of Central Enterprise Based on WACC Valuation

Baoyan Li^{1,*}

¹Chemical Engineering, University College London, London, WC1E 6BT

Abstract: Weighted average cost of capital (WACC) is a method of calculating a company's cost of capital by weighting the weight of each type of capital to the total source of capital. Economic Value Added (EVA) is the net operating profit after tax of an enterprise minus the opportunity cost of all invested capital including equity and debt. Given the "one-size-fits-all effect" of WACC in the evaluation of central enterprises' performance, this paper uses PetroChina as an example to verify whether there is an "inflated" or "overestimated" EVA in the evaluation of central enterprises' performance through the valuation of WACC. The results show that the relatively small WACC in EVA performance evaluation directly leads to the EVA overstatement of PetroChina. National industries are classified according to the competitiveness of industries in terms of economic value added creation and contribution. Replacing the current EVA evaluation criteria with EVA rate evaluation criteria or Delta EVA evaluation criteria is a more practical idea to solve the problem of "overstated" or "overestimated" national EVA.

1 Introduction

Ohlson J. A. Earnings [1] found that the four revisions of EVA mark a change in the thinking of the State-owned Assets Supervision and Administration Commission (SASAC) on the business performance assessment of principals of central enterprises. That is to say, it is from the initial EVA performance appraisal oriented at setting budget target value, to the EVA performance appraisal oriented at overall budget management. Finally, it turns to the state-owned capital quality, efficiency, and scientific development-oriented EVA performance appraisal central enterprises.

Modigliani [2] found that the weighted average of "all-in-the-world effects" refers to the "three non-considerations" that apply to the current assessment system. Under this concept, WACC machinery is unified as the average cost of capital for different Chinese central enterprises in EVA performance evaluation. In addition, there are three grades: basic cost of capital (5.5%), reduced cost of capital (4.1%) and increased cost of capital (6.0%). The empirical analysis by Yangyang [3] shows that among the thirteen industries in China, the cost of equity capital was 9.61% over the ten-year period, which is an issue worth exploring. The base capital cost ratio (5.5%) is 9.61%, a decrease of 4.11 percentage points; (a) is the floating capital cost of 3.61 percentage points at 6.0%; an average decrease of 4.41%. The above three are underestimated on average by [2.61%, 8.13%], while the average underestimation is 5.37%. If these three ratios are compared with WACC, which takes into account creditors' equity, the average ratio of these three ratios in the performance assessment of central enterprises

will be significantly lower. This not only biases the usefulness of the EVA assessment system but also deviates from its substance.

Based on the above analysis, and on the premise of sorting out the mechanism and difficulties of EVA performance assessment for the heads of central enterprises, this paper empirically proves whether EVA is "inflated" or "overestimated" through the estimation of WACC, combined with the basic data of PetroChina. Finally, the basic ideas and methods to solve EVA "inflated" or "overestimated" are proposed.

2 Eva Performance Appraisal Mechanism for Principals of Central Enterprises

2.1 Basic Method of EVA Calculation

According to the EVA assessment rules attached to the Interim Measures for The Assessment of Business Performance of The Heads of Central Enterprises, EVA is the balance of the after-tax net operating profit of central enterprises minus the cost of capital. Net operating profit after tax refers to the net profit in the income statement adjusted for taxable income and tax and expenses, and the cost of capital is equal to the adjusted capital and the average cost of the capital product. Adjusted average equity capital can be further combined with average total debt and average minus interest-free and average current liabilities and construction works [4]. That is:

thermal design of tube and shell heat exchanger and ijert - Oct 09 2022

feb 1 2021 htri software is used to verify analytical thermal design it gives close results as that of obtain from thermal design the comparision between calculated values and software obtained values concludes the varification of the parameters the proven theoretical methods are in good agreement with the software results

shell and tube heat exchanger design using htri software - May 04 2022

shell and tube heat exchanger design using htri software uploaded by ghifari syhd a comparison study of heat exchanger design using two methods of approach of manual calculations and using htri software copyright all rights reserved available formats download as pdf txt or read online from scribd flag for inappropriate content download now

design of a heat exchanger using htri world wide simulation - Mar 02 2022

design of a heat exchanger using htri world wide simulation htri gives various designs with different shell id with optimum baffle spacing for given tube length and tube passes htri gives shell id in standard inch format it has to be fine tuned to the nearest round number that is

training htri - Jan 12 2023

htri offers several different approaches to training you can attend htri hosted events online or in person we can provide training onsite at your facility or online for your entire team we even have free hour long webinars for htri members

pragyan 2019 heat exchanger design using htri - Feb 01 2022

mr vivekanandan mahendran expertises in the area of design automation cfd fea piping stress analysis pressure vessel design and heat exchanger thermal design he currently works as ceo in trycae industrial engineering pvt ltd is a principle consultant at htri he is a certified solid works professional a certified solid works

pdf heat exchanger design researchgate - Sep 20 2023

dec 20 2017 this paper establish a simulation program about the spiral condenser based on theoretical behavior of thermal parameters used r134a as refrigerant analysis the influence of heat transfer area on

[htri youtube](#) - Nov 10 2022

htri is the global leader in process heat transfer technology and heat exchanger design software we conduct innovative research develop software and provide services to meet your

heat exchanger design using htri pdf pdf scribd - Jul 06 2022

equipment process design 1 now run and the dp in hot shell side becomes 1 62 bar and overdesign factor becomes 22 2 now increase the shell id and overdesign factor becomes 35 and dp reduces to 0 89 bar 3 now increase baffle spacing to 250 mm

and run it again dp reduces to 0 215 and overdesign

optimization of air cooled heat exchanger design using htri - Apr 03 2022

for heat exchanger design is htri in software we have option of rating design simulation 5 in commercial software design user defined values of independent design parameters fixed parameters process specification and user updated values of independent design parameter sent to design routine from that it is sent to trial solution

design manual htri - Aug 19 2023

the design manual is the comprehensive reference for htri s thermal design recommendations for all types of heat exchangers it summarizes calculation methods in htri software provides design recommendations and offers practical design tips topics covered include basic methods for single phase pressure drop and heat transfer condensation

make better heat exchanger design decisions with exchanger htri - Jul 18 2023

exchanger optimizer helps engineers solve different types of design problems enabling specification of more accurate design details exchanger optimizer 3 0 features more robust analysis of complicated geometries for example fixed tubesheet heat exchangers are often designed with expansion joints to handle the differential thermal growth

getting started building your first case in xphe webinar htri net - Sep 08 2022

join this xphe webinar on january 24 2024 for an overview of the program s user interface and basic functionality then demonstrates the specification of an exchanger design in xphe using the information in an api 662 spec sheet join this session for a step by step specification of a new xphe case including process conditions physical properties and unit geometry

pdf design validation of shell and tube heat exchanger by htri - May 16 2023

jan 1 2012 in design calculation htri software is used to verify manually calculated results in this paper attempt is made to overcome some major theoretical assumptions and serve practical approach as

optimization of air cooled heat exchanger design using htri - Aug 07 2022

optimization of air cooled heat exchanger design using htri research and scientific innovation society rsis international in this paper an optimization process is carried out by varying tube pitch transverse pitch number of tube rows and air velocity using heat transfer research incorporation htri software

tag heat exchanger design htri - Apr 15 2023

aug 17 2022 fixed tubesheet heat exchangers are often designed with expansion joints to handle the differential thermal growth between the tubes and the shell learn how to use exchanger optimizer 6 1 8 to specify operating metal temperatures and evaluate the cost impact of adding a flanged and flued or bellows expansion joint modify designs read more

software htri - Feb 13 2023

xchanger suite is software for the rating simulation and or design of a wide variety of heat transfer equipment including shell

and tube and non tubular exchangers air coolers and economizers and fired heaters xchanger suite modules include x fh ultra
mech 03 design of shell tube heat exchanger using htri - Jun 05 2022

shell and tube heat exchanger is a class of heat exchanger designs it is the most common type of heat exchanger in oil re
neries and other large chemical processes and it is suite for high pressure applications as its name implies this type of heat
exchanger consists of a shell a large pressure vessel with a bundle of tubes inside the shell

overview of xchanger suite htri - Dec 11 2022

what is xchanger suite xchanger suite considered to be the most advanced thermal process design and simulation software
rates simulates and or designs a variety of heat transfer equipment htri s calculation methods are backed by over half a
century of applied research and data collected on industrially relevant heat transfer equipment

htri htri - Jun 17 2023

htri conducts onsite and regional training around the globe to enable members to fully utilize our powerful heat exchanger
design and simulation software and expand their industry knowledge learn more

thermal design of shell and tube heat exchanger - Mar 14 2023

jan 1 2017 the objective of the present work is to perform thermal design of a shell and tube heat exchanger that using htri
software to makes the process energy efficient
