Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Communications, Technology, and the Internet, 2015

**Privacy in the Age of Big Data** Theresa Payton, Ted Claypoole, 2023-03-15 A thorough update to a classic in the field of privacy and big data We have a global privacy problem The average person provides more information about themselves to more outsiders than any time in history Corporations governments and even our neighbors can know where we are at times can quickly learn our preferences and priorities and see who we meet The past decade has brought deep changes in the collection of our private information the regulation of that collection and in people s sensitivity to loss of privacy The nascent privacy threatening technology trends of a decade ago have blossomed into relentless data capturing systems that police and companies have come to rely on To address the expansion of personal data capture entire data regulatory regimes have arisen throughout the world with new regulations added each year People are more concerned regulators are more aggressive yet data collection continues to increase with consequences around the world Social media use has fragmented in the past five years spreading personal information over dozens of platforms Even most of our new televisions have started collecting second by second information about our households recently and some of those televisions can recognize the individuals watching and the devices they carry Amazon just activated a new worldwide network using bandwidth from personal wifi of Echo devices and Ring security

systems The beat of new intrusions never seems to end These data trends are relentless and yet response to the pandemic accelerated them Rapid development of contactless everything became the norm Contact tracing apps became acceptable QR codes for everything from menus to contact information were created quickly Businesses are faced with hybrid in office and remote workforces More people are dependent on online and mobile technologies for food medicine and even human connection And each of these contacts can be captured somewhere and logged in a file for marketing or surveillance People want to keep their lives private but they don't know how The second edition of *Privacy in the Age of Big Data* addresses the significant advances in data driven technology their intrusion deeper in our lives the limits on data collection newly required by governments in North America and Europe and the new security challenges of world rife with ransomware and hacking This thoroughly updated edition demonstrates personal privacy vulnerabilities and shows ways to live a safer more private life Other privacy books tend to focus deeply on the evils of large tech companies or more academic and technical concerns But *Privacy in the Age of Big Data* second edition helps regular people understand the privacy threats and vulnerabilities in their daily lives and will provide solutions for maintaining better privacy while enjoying a modern life Unlike other books this one shows what you can do to make a difference to understand your current digital footprint and what you need to do to claw back your privacy and secure it in the future While *PRIVACY IN THE AGE OF BIG DATA* will have cross sectional appeal to many demographics working adults 25 60 and CEOs and Boards of businesses are the primary demographic young enough to know we need to do something to protect privacy and old enough to remember what happens when we haven't in the past With down to earth prose and examples pulled from daily life the writing style will attract buyers of all education levels

*Algorithmic Trading* Ernie Chan, 2013-05-21 Praise for Algorithmic TRADING Algorithmic Trading is an insightful book on quantitative trading written by a seasoned practitioner What sets this book apart from many others in the space is the emphasis on real examples as opposed to just theory Concepts are not only described they are brought to life with actual trading strategies which give the reader insight into how and why each strategy was developed how it was implemented and even how it was coded This book is a valuable resource for anyone looking to create their own systematic trading strategies and those involved in manager selection where the knowledge contained in this book will lead to a more informed and nuanced conversation with managers DAREN SMITH CFA CAIA FSA Managing Director Manager Selection Portfolio Construction University of Toronto Asset Management Using an excellent selection of mean reversion and momentum strategies Ernie explains the rationale behind each one shows how to test it how to improve it and discusses implementation issues His book is a careful detailed exposition of the scientific method applied to strategy development For serious retail traders I know of no other book that provides this range of examples and level of detail His discussions of how regime changes affect strategies and of risk management are invaluable bonuses ROGER HUNTER Mathematician and Algorithmic Trader **CompTIA A+ 220-801 and 220-802 Cert Guide** Mark Edward Soper, Dave Prowse, Scott Mueller, 2012-08-28
