Stephen Sennott, 2004 A balance of sophistication and clarity in the writing authoritative entries and strong cross referencing that links architects and structures to entries on the history and theory of the profession make this an especially useful source on a century of the world's most notable architecture The contents feature major architects firms and professional issues buildings styles and sites the architecture of cities and countries critics and historians construction materials and planning topics schools movements and stylistic and theoretical terms Entries include well selected bibliographies and illustrations Reference that rocks American Libraries May 2005 *Region* Simon Richards, Robert Schmidt III, Cagri Sanliturk, Falli Palaiologou, 2023-07-28 This book explores how the concept of region has evolved over time and shaped architectural culture and practice It questions what the words region and regional mean for architecture cities and landscapes past and present and speculates on the forms they might take in the future Region is explored in many thematic guises as a real geographical site of evolving socio economic activity as a mythical locus of enduring value as a gatekeeper of indigenous crafts and vernacular techniques as a site of architectural and artistic imagination as a repository of contested conflicted and mobile identities The contributing chapters take these themes from

the theoretical and literary page through to architectural and urban practice and from the scale of the domestic hearth through to the ocean archipelago and international law enriching the long standing trope of viewing architectural regionalism purely as a matter of style Curated into four key thematic areas Theorised Regions Contested Regions Heritage Regions and Future Regions the book incorporates the values concerns and approaches of a truly diverse international community of scholars curators and practitioners as well as the design work of international students tasked to explore what region means to them Architecture, Power and National Identity Lawrence Vale,2014-05-01 The first edition of Architecture Power and National Identity published in 1992 has become a classic winning the prestigious Spiro Kostof award for the best book in architecture and urbanism Lawrence Vale fully has fully updated the book which focuses on the relationship between the design of national capitals across the world and the formation of national identity in modernity Tied to this it explains the role that architecture and planning play in the forceful assertion of state power The book is truly international in scope looking at capital cities in the United States India Brazil Sri Lanka Kuwait Bangladesh and Papua New Guinea Key Houses of the Twentieth Century Colin Davies,2006 Featuring over 100 of the most significant and influential houses of the twentieth century For each of the houses included there are numerous accurate scale plans showing each floor together with elevations sections and site plans where appropriate All of these have been specially drawn for this book and are based on the most up to date information and sources Architectural Record ,2001 Architecture ,2003

Anjalendran David Robson,2014-01-21 This beautifully illustrated book showcases the works of one of Sri Lanka s most influential architects Anjalendran an ethnic Tamil and visionary artist During the past 25 years of civil war in Sri Lanka Anjalendran has stayed on creating architecture that has attracted interest across the entire Indian subcontinent In Anjalendran David Robson explores this unique man and his uncommon vision Anjalendran s buildings have a simple directness and although totally modern in spirit they acknowledge the rich design traditions of Sri Lanka Whether working with ample budgets or at rock bottom cost like his SOS Children s Village orphanages his work focuses not only on creative buildings but a la Frank Lloyd Wright also their landscaping furniture and decoration Just as interesting as the architecture is the process by which Anjalendran works from home never employing more than four student assistants with no office no secretary no car and no cell phone He operates without a bank account and has never signed a contract with either a client or a builder With stunning color photographs plan details and behind the scenes insights Anjalendran sheds light on the works of this exceptional man **Bawa and Beyond** Tariq Jazeel,2006 Address by the speaker at International Centre for Ethnic Studies **The Architects' Journal** ,2003 Imagining Modernity Anoma Pieris,Social Scientists Association of Sri Lanka,2007 This book is a detailed study of the architecture of Valentine Gunasekara 1931 2017 It provides an innovative lens to understand the formation of a Ceylonese middle class which was inspired by the post independence desire for modernity Their experiments values and dynamic social history are the framework for this research Although neglected by

his peers and marginalized by the prevalent discourse on vernacular regionalism Gunasekara's work poses important questions regarding the utopian ideals of the modernist project and its successes and its failures in Asia More significantly his work reveals the European and American influences that shaped the first generation of Ceylonese architects and their efforts at adapting new materials and technologies to a very different climate and culture This book documents a wide range of Gunasekara's projects including residential religious and commercial buildings arguing that they represented a nascent cosmopolitanism from below that proved to be quite antithetical to regionalist trends in architecture This e book is a republication of an earlier edition published by Stamford Lake in 2007 **A + U, architecture and urbanism**, 2004
