Geography and Enlightenment David N. Livingstone,Charles W. J. Withers,1999-12-15 Geography and Enlightenment explores both the Enlightenment as a geographical phenomenon and the place of geography in the Enlightenment From wide ranging disciplinary and topical perspectives contributors consider the many ways in which the world of the long eighteenth century was brought to view and shaped through map and text exploration and argument within and across spatial and intellectual borders The first set of chapters charts the intellectual and geographical contexts in which Enlightenment ideas began to form including both the sites in which knowledge was created and discussed and the different means used to investigate the globe Detailed explorations of maps created during this period show how these new ways of representing the world and its peoples influenced conceptions of the nature and progress of human societies while studies of the travels of people and ideas reveal the influence of far flung places on Enlightenment science and scientific credibility The final set of chapters emphasizes the role of particular local contexts in Enlightenment thought Contributors are Michael T Bravo Paul Carter Denis Cosgrove Stephen Daniels Matthew Edney Anne Marie Claire Godlewska Peter Gould Michael Heffernan David N Livingstone Dorinda Outram Chris Philo Roy Porter Nicolaas Rupke Susanne Seymour Charles Watkins and Charles W J Withers

Geography Unbound Anne Godlewska,1999 At the end of the eighteenth century French geographers faced a crisis Though they had previously been ranked among the most highly regarded scientists in Europe they suddenly found themselves directionless and disrespected because they were unable to adapt their descriptive focus easily to the new emphasis on theory and explanation sweeping through other disciplines Anne Godlewska examines this crisis the often conservative reactions of geographers to it and the work of researchers at the margins of the field who helped chart its future course She tells her story partly through the lives and careers of individuals from the deposed cabinet geographer Cassini IV to Volney von Humboldt and Letronne innovators in human physical and historical geography and partly through

the institutions with which they were associated such as the Encyclop die and the Jesuit and military colleges Geography Unbound presents an insightful portrait of a crucial period in the development of modern geography whose unstable disciplinary status is still very much an issue today Opportunities and Constraints of Land Management in Local and Regional Development Erwin Hepperle, Jenny Paulsson, Vida Maliene, Reinfried Mansberger, Anka Lisec, Sonia Guelton, 2018-09-17 Land Management is normally embedded in a complex legal context which frequently consists of contradictory objectives such as strengthening of rural areas satisfying the need for affordable living and commercial space protecting environment and health supporting transport infrastructure development and preserving the landscape Land management can be understood as a process that comprises coordination of such activities while managing the use and the development of land resources It can be constrained by the land use specifications resulting from spatial planning process Along with this the legal framework often contains generally formulated concepts and open standards which provide a range of opportunities for realization while balancing the different interests In this process it is important if and how both constraints and opportunities are recognised by the actors In this volume this topic is examined from various aspects first the problems in promoting mutual understanding between researchers and the general public but also among scientists of different disciplines second the success requirements of land management instruments as well as unfortunate experience caused by land use changes third covering land management costs by absorbing value increase and other trade off aspects and fourth supporting land management by providing geodata with low cost methods **World and Its Peoples**, 2010 Presents a thirteen volume reference guide to the geography history economy government culture and daily life of countries in Europe **Contributions in Geographical Exploration: National Geographic Society, Washington, D.C.
