**Geometry of Design** Nam-Ho Kim, Ashok Kumar Das, Harold F. Snider, 2014-11-11 Engineering drawing is the instrument of communication upon which the designer must place all information necessary to define a new product Computer aided design CAD courses often involve teaching solid modelling software and we view CAD as an engineering communication tool for manufacturing As the technology of engineering design is in transition from paper drawings to solid models its education must address the challenge of covering both technologies Geometry of design integrates drafting technology based on experience with engineering design education This workbook has evolved from the course Computer

Aided Graphics and Design at the University of Florida and many pages of this textbook can be used for student assignments In order to help students to familiarize themselves with the manufacturing field experience most assignments are to be submitted in the form of complete working drawings of the parts and assembly The first three chapters introduce basic engineering drawing definitions and practices The following four chapters cover design and descriptive geometry and subsequent chapters move on to dimensions assembly line design and surface development
