This book features contributions from international experts in a variety of fields. Includes case studies where data mining techniques have been effectively applied to advance teaching and learning. Addresses applications of data mining in educational research including social networking and education policy and legislation in the classroom and identification of at-risk students. Explores Massive Open Online Courses (MOOCs) to study the effectiveness of online networks in promoting learning and understanding the communication patterns among users and students. Features supplementary resources including a primer on foundational aspects of educational mining and learning analytics. *Data Mining and Learning Analytics Applications in Educational Research* is written for both scientists in EDM and educators interested in using and integrating DM and LA to improve education and advance educational research.

*The Elements of Statistical Learning* Trevor Hastie, Robert Tibshirani, Jerome Friedman, 2009-08-26 This book describes the important ideas in a variety of fields such as medicine, biology, finance, and marketing in a common conceptual framework. While the approach is statistical, the emphasis is on concepts rather than mathematics. Many examples are given with a liberal use of colour graphics. It is a valuable resource for statisticians and anyone interested in data mining in science or industry. The book's coverage is broad from supervised learning (prediction) to unsupervised learning. The many topics include neural networks, support vector machines, classification trees, and boosting—the first comprehensive treatment of this topic in any book. This major new edition features many topics not covered in the original, including graphical models, random forests, ensemble methods, least-angle regression, path algorithms for the lasso, non-negative matrix factorisation, and spectral clustering. There is also a chapter on methods for wide data ( $p$  bigger than  $n$ ) including multiple testing and false discovery rates.
