Computational Science and Its Applications - ICCSA 2020 Osvaldo Gervasi, Beniamino Murgante, Sanjay Misra, Chiara Garau, Ivan Blečić, David Taniar, Bernady O. Apduhan, Ana Maria A. C. Rocha, Eufemia Tarantino, Carmelo Maria Torre, Yeliz Karaca, 2020-09-29 The seven volumes LNCS 12249 12255 constitute the refereed proceedings of the 20th International Conference on Computational Science and Its Applications ICCSA 2020 held in Cagliari Italy in July 2020 Due to COVID 19 pandemic the conference was organized in an online event Computational Science is the main pillar of most of the present research industrial and commercial applications and plays a unique role in exploiting ICT innovative technologies The 466 full papers and 32 short papers presented were carefully reviewed and selected from 1450 submissions Apart from the general track ICCSA 2020 also include 52 workshops in various areas of computational sciences ranging from computational science technologies to specific areas of computational sciences such as software engineering security machine learning and artificial intelligence blockchain technologies and of applications in many fields *Agile Processes in Software Engineering and Extreme Programming* Casper Lassenius, Torgeir Dingsøy, Maria Paasivaara, 2015-05-15 This book contains the refereed proceedings of the 16th International Conference on Agile Software Development XP 2015 held in Helsinki Finland in May 2015 While agile development has already become mainstream in industry this field is still constantly evolving and continues to spur an enormous interest both in industry and academia The XP conference series has always

played and continues to play an important role in connecting the academic and practitioner communities providing a forum for both formal and informal sharing and development of ideas experiences and opinions The theme of XP 2015 Delivering Value Moving from Cyclic to Continuous Value Delivery reflects the modern trend towards organizations that are simultaneously very efficient and flexible in software development and delivery The 15 full and 7 short papers accepted for XP 2015 were selected from 44 submissions All of the submitted papers went through a rigorous peer review process Additionally 11 experience reports were selected from 45 proposals and in each case the authors were shepherded by an experienced researcher

Human Work Interaction Design Torkil Clemmensen, 2021-09-23 An approach to socio technical HCI called Human Work Interaction Design HWID emerged around 2005 It has grown steadily and now is the time for sharing this research with a wider audience In this book the HWID approach is used to discuss socio technical HCI theory cases methods and impact The book introduces HWID as a multi sided platform for theorizing about socio technical HCI work design in the digital age It presents design cases that illustrate the design of socio technical relations provides specific advice for researchers consultants and policy makers and reflects on the open issues related to theorizing about sociotechnical HCI The benefits of HWID include that it meets the requirement of taking both the social and the technical into account while focusing strongly on the relationship between the social and the technical In addition it is truly international and explicitly considers local cultural organizational and technological contexts

Agile Product Development Tathagat Varma, 2015-11-05 Shows you what it takes to develop products that blow your users away and take market share from your competitors This book will explain how the principles behind agile product development help designers developers architects and product managers create awesome products and how to look beyond a shiny user interface to build a great product Most importantly this book will give you a shared framework for your product development team to collaborate effectively Product development involves several key activities including ideation discovery design development and delivery and yet too many companies and innovators focus on just a few of them much to the detriment of the product s success in the marketplace As a result we still continue to see high failure rates in new product development be it inside organizations or startups Unfortunately or rather fortunately these failures are largely avoidable In the last fifteen years advances in agile software development lean product development human centered design design thinking lean startups and product delivery have helped improve individual aspects of product development However not enough guidance has been available to integrate them in the context of the product development life cycle Until now Product developer extraordinaire Tathagat Varma in Agile Product Development integrates individual knowledge areas into a field manual for product developers Organized in the way an idea germinates sprouts and grows the book synthesizes the body of knowledge in a pragmatic way that is more natural to the entire product creation process rather than from individual practices that constitute it In today s hyper innovative world being first to the market or delivering feature loaded products or even offering the latest technology doesn't

guarantee success anymore Sure those elements are all needed in the right measures but they aren't sufficient by themselves And getting it right couldn't be more important Building products that deliver awesome user experiences is the top challenge facing businesses today especially in a post Apple world where user experience and design has been elevated to a cult status

Mensch und Computer 2015 - Usability Professionals Anja Endmann, Holger Fischer, Malte Krökel, 2015-09-14 Usability Professionals Workshop deals with the practical applications of human machine interaction research It is organized by the German ACM specialty section of the UPA Usability Professionals Association The volume presents the latest research findings through case studies and practice reports along with in depth discussions
