

**DANGER**

**CAUTION**

- Ammunition reloading can be dangerous if done improperly and can result in serious injury or death.
- Reloading rifle ammunition requires extra care due to extremely high pressures. Make sure your cases are in good condition. Inspect them before each reloading for damage and wear. Cases must be trimmed. An excessively long case will pinch the bullet in the end of the rifle chamber and cause dangerously high pressure that could damage your gun and cause personal injury.
- Use only Remington™ or CCI™ primers. Other brands like Federal™, can explode with sufficient force to seriously injure the user or persons nearby. Never place more than 100 primers in the tray.
- Reloading should not be attempted by persons not willing and able to read and follow instructions exactly. Do not permit distractions while loading. This is a complex machine that needs your fullest attention.
- Children should not be permitted to reload ammunition without strict parental supervision.
- Always wear safety glasses and hearing protection when reloading and shooting.
- Ammunition loaded with these tools and data should only be used in modern guns in good condition. We do not accept responsibility for ammunition loaded with these tools or data as we have no control over the manufacture and storage of components or the loading procedure and techniques. Primers and gun powder, like gasoline and matches, can be dangerous if improperly handled or misused.
- Verify proper powder and charge for bullet weight selected.
- Be extremely careful to avoid a double charge. If in doubt, empty the case and recycle it.
