Guided Activity The Enlightenment Answers:

Liberal Democracy, Law and the Citizen Speaker Ian Cram, 2022-08-25 This book delivers an original theoretically informed analysis of the legal regulation of online speech Rejecting the narrow pluralism of elitist and deliberative accounts of the citizen's role in political discourse the book defends a participatory account of speech in non-deliberative settings The latter account of political pluralism best captures the republican democratic aspiration for popular ongoing authorship of the laws and the centrality of freedom to dissent in democratic theory The legal and policy implications for governments and social media platforms of this inclusive envisioning of public discourse are then elaborated upon In the digital world anyone with access to the internet can be a speaker Speech on public platforms has become democratised At the same time aspects of online speech are plainly problematic Concerns exist about disinformation fake news deep fakes weaponised speech and trolls Offensive speech and the polarising effects of robustly expressed political opinion are also troublesome These assorted downsides of democratised speech are said to undermine the integrity of democratic processes and institutions Public debate is distorted and coarsened and the electorate are misled How ought the liberal democratic state respond to these challenges The discussion is intended to be read by academics and researchers with interests in democratic theory digital communications and freedom of expression It offers a stimulating and distinctive contribution to debates about online speech

The American Crisis in Physical Activity Education F. Zeigler Earle F. Zeigler, Earle F. Zeigler, 2010 The American Crisis in Physical Activity Education was written because the author is terribly upset about what is happening to physical activity education and so called educational sport within the education system He lives in North America as a dual citizen and he feels sad that we appear to be a large part of the world's problem He thought that the world would be a better place for all people by the year 2000 Because now it definitely doesn't seem to be heading in that direction he is forced to conclude 1 that in many ways we are confused about what our values are at the present 2 that we need to reconsider them and then restate exactly what we believe they are in light of the changing times and 3 finally that we will then need to assess more carefully on a regular basis whether we are living up to those values we have chosen and so often glibly espouse Physical activity education including what is called educational sport is a field that in the 21st century is facing one more crossroad in its torturous historical development
