Disciplinary and Dissent in Cultural Studies Cary Nelson, Dilip Gaonkar, 2013-10-28 First published in 1996 As recently as the early 1990s people wondered what was the future of cultural studies in the United States and what effects its increasing internationalization might have What type of projects would cultural studies inspire people to undertake Would established disciplines welcome its presence and adapt their practices accordingly *Disciplinary and Dissent in Cultural Studies* answers such questions It is now clear that while striking and innovative work is underway in many different fields most disciplinary organizations and structures have been very resistant to cultural studies Meanwhile cultural studies has been subjected to repeated attacks by conservative journalists and commentators in the public sphere Cultural studies scholars have responded not only by mounting focused critiques of the politics of knowledge but also by embracing ambitious projects of social political and cultural commentary by transgressing all the official boundaries of knowledge in a broad quest for cultural understanding This book tracks these debates and maps future strategies for cultural studies in academia and public life The contributors to *Disciplinary and Dissent in Cultural Studies* include established scholars and new voices In a series of polemic and exploratory essays written especially for this book they track the struggle with cultural studies in disciplines like anthropology literature and history and between cultural studies and very different domains like Native American culture and the culture of science Contributors include Arjun Appadurai Michael Denning Lawrence Grossberg Cary Nelson Constance Penley Andrew Ross and Lynn Spigel

Psychoanalytic Reflections on Politics Eszter Salgó, 2013-11-07 *Psychoanalytic Reflections on Politics* *Fatherlands in mothers hands* is a playful exploration of how people's desires fantasies and emotions shape political events and social phenomena It highlights the mythical sources of today's political projects the power of political imagination and the function of symbolism in political thought Eszter Salgó argues that the driving force for the formation of political communities is fantasy illusions in a Winnicottian sense phantasies in a Lacanian sense phantoms as described by Nicolas Abraham and Maria Torok and dreams as interpreted by Sándor Ferenczi She introduces the metaphor of the fantastic family as a symbolic representation of political communities both to reflect on people's deeply felt desire to find in public life the resolution love and wholeness of early childhood and to unveil the political elite's readiness to don the mask of the ideal parent The book is divided into two parts The first part of the book explores the theories of Donald Winnicott and Jacques Lacan the matrimony on the stage of politics between the good enough mother and the Symbolic Father which inaugurates the story of democracy's fantastic family The second part presents the fantastic families of selected countries such as Hungary Italy and the world community to explain the proliferation of cosmogony projects and to document the failure of the political elites to offer a satisfactory performance of their maternal and paternal functions *Psychoanalytic Reflections on Politics* *Fatherlands in mothers hands* presents a new way of considering the art of politics based on the understanding that people perceive reality through imagination and unconscious fantasy It will be of

interest to psychoanalysts and academics from across the disciplines of politics psychology anthropology sociology philosophy literature and art *Donald W. Winnicott* Laura Dethiville,2018-04-24 Winnicott was continually innovating inventing and proposing unexpected solutions in his analytical work whenever he noticed that clinical experience didn't stick to the theory This approach can make his work seem rather diffuse with concepts that are sometimes confusing and needing to be clarified Laura Dethiville has taken on the task of re-evaluating and explaining the principal rudiments of his theories such as the transitional object the self the false self the importance of environment and dissociation She also reveals how Winnicott showed himself to be a forerunner in the care of symptomatic illness in our society including his innovative treatment of loss of identity anorexia or bulimia delinquency psychosomatic illness and school disorders In this book the author has succeeded in avoiding psychoanalytic jargon and although initially aimed at psychoanalysts it is also accessible for educators child carers paediatricians and to all those interested in early childhood the constitution of the psyche and the constitution of the interpersonal link
