National Legal Systems and Globalization Pierre Larouche, Péter Cserne, 2012-11-27 This book presents the results of research project financed by the Hague Institute for the Internationalization of Law HiiL and carried out at the Tilburg Law and Economics Center TILEC of Tilburg University The project team shows that globalization instead of threatening national legal systems put them in a new role and gives them continuing relevance First of all once one takes a more functional view of the law based on law and economics and comparative law literature harmonization or unification of national legal systems is no longer a foregone conclusion Secondly fundamental constitutional principles continue to bear in the era of multi level and transnational governance they become governance principles divorced from specific institutional settings Finally looking beyond regulatory competition and comparative law legal emulation provides a rich and fruitful model to explain the interplay between legal systems This book explores these three themes both at a theoretical level and in the light of specific examples

Courts' Inquiry into Arbitral Jurisdiction at the Pre-Award Stage Sandra Synková, 2013-06-14

International arbitration has become the favored method of resolving disputes between business partners in almost every aspect of international trade commerce and investment. The resolution of a dispute by means of international arbitration provides the parties with an opportunity to resolve their disputes in a private, confidential, cost and time efficient manner before a neutral tribunal of their choice. However, challenges to arbitral jurisdiction have become a common practice in the field. Resolution of such challenges may significantly delay the resolution of the parties' primary substantive dispute, increase overall dispute resolution costs, and even whittle down the benefits of the parties' bargain to arbitrate. Accordingly, adopting a proper approach to the resolution of such disputes becomes crucial to the efficacy of international arbitration as a system of dispute resolution. The present book provides a comparative analysis of the practice of three carefully selected legal orders: the English, German, and Swiss, and outlines possible ways forward. As the work strikes a balance between theory and practice, it will appeal to practitioners, researchers, but also students looking to develop their understanding of the international arbitration field.

The Research Handbook analyses the interlinkages between producers and consumers of food, as well as the environmental effects of the global food network and the repercussions on human health.

Derrida and Law Pierre Legrand, 2017-07-05. This volume gathers together sixteen seminal articles, all written by leading scholars, which articulate and effectuate the influence of Derrida's scholarship on the field of law. The articles included in this collection are underpinned by the authors' shared belief that the intellectual challenges posed by Derrida's work to legal scholarship are as challenging as they are pressing and as profound as they are inescapable. In addition to a thorough introduction addressing salient aspects of Jacques Derrida's engagement with law, this book comes with an extensive bibliography of sources in English. This provides the reader with a carefully selected list of more than one hundred texts, all of which serve as introductory pathways to Derrida's philosophy and, in particular, to the interaction between Derrida and law. A fine reminder of the trans-disciplinary influence of Jacques Derrida's thought, this landmark collection is destined to generate substantial interest in philosophy departments and law schools alike.

The enforceability of the human right to adequate food Bart Wernaart, 2023-09-04. While the right to adequate food is often discussed in the context of developing countries, especially in situations where access to adequate food is a problem on a larger scale, this book focusses on the right to food in two Western countries in which, theoretically, the circumstances allow this right to be enjoyed by each individual. Through a legal comparative study, the enforceability of the right to food is compared between the Netherlands and Belgium in light of the current UN Human Rights system. There seems to be a difference between what the countries do, what they say they do, and what they should do on the matter. As it appears, the coincidental constitutional circumstances mainly determine the

enforceability of the right to food rather than the content of the human right in itself This book includes a thorough analysis of suitable comparative legal methodology and the embedment of the right to food in the UN human right system Furthermore for both countries an in depth analysis of the case law on the right to food mostly concerning the status of foreigners the constitutional context in which the Judiciary operates and the relevant UN reports and subsequent procedures are outlined Finally recommendations are made to both countries and the relevant UN Committees

Law in Civil Society Richard Dien Winfield,1995 Law in Civil Society advances a new and comprehensive theory of how legal institutions should be reformed to uphold the property family and economic rights of individuals in civil society In so doing it offers a powerful challenge to the dominant legal theories and practices espoused by liberalism positivism natural law and critical legal thought Winfield argues against the prevailing assumptions of legal philosophers who dogmatically embrace formal or historical conceptions of law True law he contends must be constructed within the context of the different spheres of rights and ultimately can only exist within a civil society committed to self determination and community Working from these fundamental premises he analyzes in detail a rich array of important legal issues fair access to legal representation the rationale for jury trials appropriate distinctions between civil and criminal legal procedures the controversies pitting common law versus codification and adversarial versus inquisitorial systems of trial and the relationship between civil society and the state Much inspired by Hegel s Philosophy of Right Winfield s study offers the most convincing critique yet of that renowned philosopher s work and in the process provides a more complete and coherent conception of law than Hegel himself articulated Provocative and highly instructive the book should attract scholars teachers and students in legal and political

BOOK JACKET *Precedent and the Law* E. H. Hondius, 2007 This volume contains the general report and the national reports on the subject Precedent and the Law which were submitted to the world congress of the International Academy of Comparative Law held in Utrecht in 2006 Precedent is often considered a major distinction mark between the civil law and the common law But is this still the case In common law jurisdictions the sharp edges of stare decisis seem to water down whereas civil law jurisdictions now do admit that precedents at least de facto constitute a source of law Convergence however would be too strong a word to characterise these tendencies These reports throw light on this issue
