

Below are concise yet comprehensive answers to each of the 23 questions, covering the key points from invertebrate biology:

### 1. What defines an invertebrate, and why do they make up over 95% of animal species?

- **Definition:** Invertebrates are animals that **lack a vertebral column** (backbone).
- **Why so many:**
  - 1 **Evolutionary success:** Their body plans (e.g., exoskeletons, simple body cavities) allow them to occupy diverse habitats.
  - 2 **Rapid reproduction and high adaptability** help them proliferate quickly.
  - 3 Many invertebrate lineages originated early in animal evolution, accumulating countless species over time.

### 2. What are the main characteristics of ctenophores, and how does having a complete digestive system give them an advantage in their marine environment?

- **Main Characteristics:**
  - **Marine organisms** with fewer than 100 known species.
  - **Eight rows of cilia ("combs")** for propulsion.
  - **Two long, sticky tentacles** (without stinging cells) for capturing prey.
  - **Often bioluminescent and hermaphroditic.**
- **Complete Digestive System Advantage:**
  - Possessing a **mouth, gastrovascular cavity, and anal pores** enables **continuous feeding and efficient nutrient processing**, allowing them to handle larger prey and maintain a higher metabolic rate.

### 3. Describe the structure of a sponge, focusing on the roles of choanocytes and amoebocytes.

- **Basic Structure:**
  - Sponges are **multicellular** but **lack true tissues**. They have an internal cavity (**spongocoel**) and an opening at the top called the **osculum**.
- **Choanocytes (Collar Cells):**
  - **Line the spongocoel** and use **flagella** to create a water current.
  - **Trap and ingest** food particles (bacteria, plankton) via **phagocytosis**.
- **Amoebocytes:**
  - **Move within the mesohyl** (gel-like layer).
  - **Digest and distribute** nutrients from choanocytes to other cells.
  - **Secrete structural components** (e.g., **spicules** or **spongin**).

### 4. How do sponges reproduce both sexually and asexually?
