

# MANUAL DATABASE VS. COMPUTERIZED DATABASE

Manual Database	Computerized Database
<p>Manual database is the record keeping systems in which human being manage the whole database without the support of computers.</p>	<p>Computerized database is a database that can be managed or accessed by computers.</p>
<p>A Manual database is like a filing cabinet and is very slow and clumsy at organizing information.</p>	<p>A Computerized database is stored in a computer and is very fast at organizing information, and grouping related data.</p>
<p>In a manual database system, information must be found by hand rather than electronically. Someone looking for information in a manual database may have to spend hours searching for a particular piece of data, which is a very time consuming job.</p>	<p>A Computerized database will typically allow users to search the entire database for specific information in seconds.</p>
