OPERATIONS

WARNING

To avoid fire or explosion caused by the igniting of vapors or dust due to the arcing of the motor brushes do not operate this vac in areas with flammable vapors such as lighter fluid, cleaners, oil-base paints, gasoline, alcohol or explosive dust such as coal, magnesium, grain or gun powder in the air. Do not vacuum explosive dust, flammable or combustible liquids or hot ashes. Do not use this vac as a sprayer for any flammable or combustible liquid. To avoid health hazards from vapors or dusts, do not vacuum toxic materials. To avoid electrical shock do not expose to rain. Store vac indoors. Unplug power cord before changing or cleaning filter or emptying the dust drum.

3. A dry filter is necessary to pick up dry material. If you use your vac to pick up dust when the filter is wet the filter will clog quickly and be very difficult to clean.
4. If your filter is wet but you need to pick up dry material you can quickly dry the filter by letting the vac run for about ten minutes before you use it to pick up the dry material. The clean air rushing through the vac will dry the filter enough for dry use after about 10 minutes of running time.

Vacuumping Liquids

1. The filter must be dried after using the vac to pick up liquids to avoid mildew and possible damage to the filter.
2. When picking up small amounts of liquid the filter will not become very wet. However, when picking up several drums full of liquid the filter will become saturated and misting will appear in the exhaust air. At this time you should dry the filter or change to a dry filter to eliminate the misting and possible dripping of liquid around the lid.
3. This vac is equipped with a float mechanism which will rise automatically to cut off suction when the liquid in the drum reaches a predetermined level. When the float rises turn off the vac, unplug the power cord, and empty the drum. You will know when the float rises because suction at the end of the hose will cease and the motor noise will become higher in pitch.

Vacuumping Dry Materials

1. The Filter must be in correct position at all times to avoid leaks and possible damage to vac.
2. When using your vac to pick up very fine sawdust or dust from drywall type material it will be necessary for you to empty the drum and clean the filter at more frequent intervals to maintain peak suction at the end of the hose.
