iNetSec 2009 - Open Research Problems in Network Security Jan Camenisch, Dogan Kesdogan, 2009-11-02 The working group WG 11 4 of IFIP ran an iNetSec conference a few times in the past sometimes together with IFIP security conference sometimes as a stand alone workshop with a program selected from peer reviewed submissions When we were elected to chair WG 11 4 we asked ourselves whether the security and also the computer science community at large bene ts from this workshop In particular as there are many too many security conferences it has become difficult to keep up with the eld After having talked to many colleagues far too many to list all of them here we decided to try a different kind of workshop one where people would attend to discuss open research topics in our eld as typically only happens during the co ee breaks of ordinary conferences To enable this we called for abstracts of 2 pages where the authors outline the open

problems that they would like to discuss at the workshop the intent being that the author would be given 15 minutes to present the topic and another 15 minutes for discussion These abstracts were then read by all members of the Program Committee and ranked by them according to whether they thought this would lead to an interesting talk and discussion We then simply selected the abstracts that got the best rankings We were happy to see this result in many really interesting talks and discussions in the course of the workshop Of course these lively and direct discussions are almost impossible to achieve in a printed text Still we asked the authors to distill the essence of these discussions into full papers The results are in your hands
