Multiple Choice

Identify the letter of the choice that best completes the statement or answers the question.

- Offspring that result from crosses between true-breeding parents with different traits
 - are true-breeding.
 - make up the F₂ generation.
 - make up the parental generation.
 - are called hybrids.
- Mendel concluded that traits are
 - not inherited by offspring.
 - inherited through the passing of factors from parents to offspring.
 - determined by dominant factors only.
 - determined by recessive factors only.
- When Mendel crossed true-breeding tall plants with true-breeding short plants, all the offspring were tall because
 - the allele for tall plants is recessive.
 - the allele for short plants is dominant.
 - the allele for tall plants is dominant.
 - they were true-breeding like their parents.
- In the P generation, a tall plant was crossed with a short plant. Short plants reappeared in the F₂ generation because
 - some of the F₂ plants produced gametes that carried the allele for shortness.
 - the allele for shortness is dominant.
 - the allele for shortness and the allele for tallness segregated when the F₁ plants produced gametes.
 - they inherited an allele for shortness from one parent and an allele for tallness from the other parent.
- The principles of probability can be used to
 - predict the traits of the offspring produced by genetic crosses.
 - determine the actual outcomes of genetic crosses.
 - predict the traits of the parents used in genetic crosses.
 - decide which organisms are best to use in genetic crosses.
- A Punnett square shows all of the following EXCEPT
 - all possible results of a genetic cross.
 - the genotypes of the offspring.
 - the alleles in the gametes of each parent.
 - the actual results of a genetic cross.
- How many different allele combinations would be found in the gametes produced by a pea plant whose genotype was RrYY?
 - 2
 - 4
 - 8
 - 16
- A cross of a white hen with a black rooster produces erminette-color offspring. This type of inheritance is known as
 - incomplete dominance.
 - polygenic inheritance.
 - codominance.
 - multiple alleles.
